SUSTAINABLE NATURAL CAFFEINE *new*

UTZ and Rainforest Alliance joined their forces during 2018 to create a better future for people and for the world.

Their aim is to be a better partner for their many stakeholders.

The new standard was built on the strengths of both organizations and decades of combined experience.

We have improved our products with two different Natural Caffeine coming from sustainable agriculture to grant better opportunities to farmers, their families, and our planet.

These programs enable farmers to utilize improved farming methods, to grow healthy crops, to generate more income, to learn how to improve working conditions, to adapt to climate change, and to protect the environment.

Tekaf® - RAC

Natural Caffeine Anhydrous
100% from Tea Leaves
Rainforest Alliance Certified

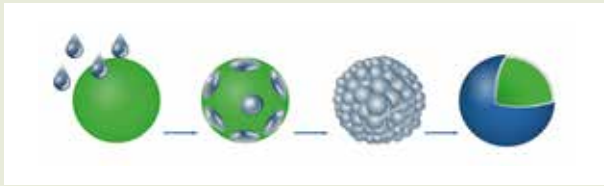

Natural Caffeine - RAC

Natural Caffeine Anhydrous
100% from Coffee Beans
Rainforest Alliance Certified

All our products are 100% obtained from selected vegetable sources.

TASTE MASKED NATURAL CAFFEINE

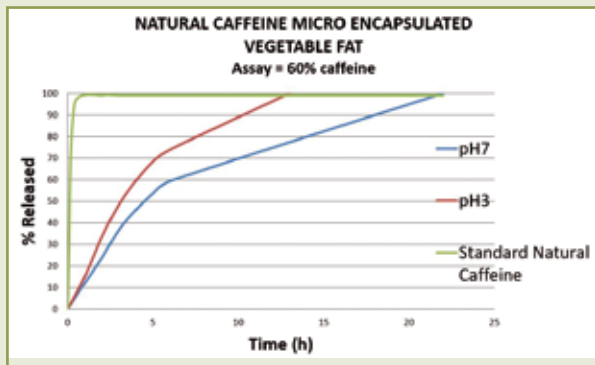

MEC Micro Encapsulated Natural Caffeine for Solid Application

MEC is our Natural Caffeine coated with vegetal oil. It is dedicated to solid applications with processing temperature up to 80°C

60% Caffeine content

MEC is developed in order to offer all benefits of Natural Caffeine without its typical bitterness. The slow release of active principle makes it suitable for special applications such as chewing gums, candies, energy powders and bars.

R50 Taste Masked Caffeine Natural Caffeine for Liquid Application

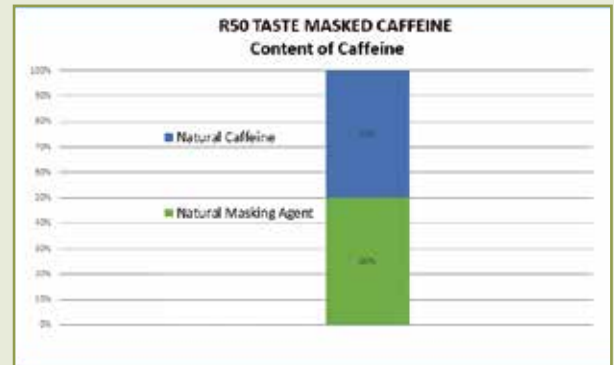

R50 is Natural Caffeine mixed with natural masking agent (vegetal extracts).

This product is fully soluble in liquid without losing its effect.

50% Caffeine content

R50 is developed in order to offer all the benefits of Natural Caffeine without its typical bitterness. Suitable for special applications such as beverages, energy drinks and energy shots with different content of caffeine.

Catechins ≥80% - Caffeine Content <0,5%
Further formulations available upon customer's request

Green Tea Extract WE

EGCG ≥ 45% - Polyphenols ≥ 98%
Catechins ≥ 65% - Caffeine Content < 0,5%
By water-ethanol extraction

Natural L-Theanine 40% from green tea leaves 100%.

Coffein Compagnie Italy former Stabilimento Testa

Stabilimento Farmaceutico Cav. G. Testa was a family owned company established in 1885 as a pharmaceutical laboratory, producing remedies on a small industrial basis.

The traditional pharmaceutical items have been gradually abandoned, and in 1950 the company developed the production of natural extracts, in particular natural caffeine anhydrous.

In the last six decades Testa took place among the most important suppliers of natural caffeine derived from the decaffeination of coffee and tea.

In 2012 Testa moved to the actual factory designed and manufactured in accordance with GMP and GSFI (BRC) rules to optimize production cycle and improve the quality of products.

Stabilimento Farmaceutico Cav. G. Testa became the preferred partner for Natural Caffeine in many food, beverage and cosmetic industries all over the world.

In May 2019 Testa became part of Coffein Compagnie Group with headquarter in Bremen and locations in Vietnam, USA, Colombia and Italy.

Stabilimento Testa is now Coffein Compagnie Italy; same expertise for Natural Caffeine since 1885.
