

The future is smarter

BIOSUS

DHA

Clean DHA from algal source

RESPONSIBLE
at root

*At every step of our process
Through every method of our delivery system
From mother earth to its ultimate form
We take responsibility of everything we do*

A Camlin Fine Sciences Company

At Camlin Fine Sciences's (CFS), we take responsibility seriously. As one of the global leading ingredient solutions manufacturer, CFS understands consumer trends across sectors and geographies. Moreover, we understand our customers' needs.

We adopt production methods that help obtain clean, sustainable and 100% natural produce. We comply with various global regulatory standards. But most important of all, we price our products responsibly.

Along with the technical brilliance of AlgalR[®], Camlin Fine Sciences developed and introduced a sustainable form of DHA, using the most efficient process.

80%

i.e almost 1 in 10 people
worldwide have low levels
of DHA (omega-3) despite
its availability through
dietary sources
like fatty fish

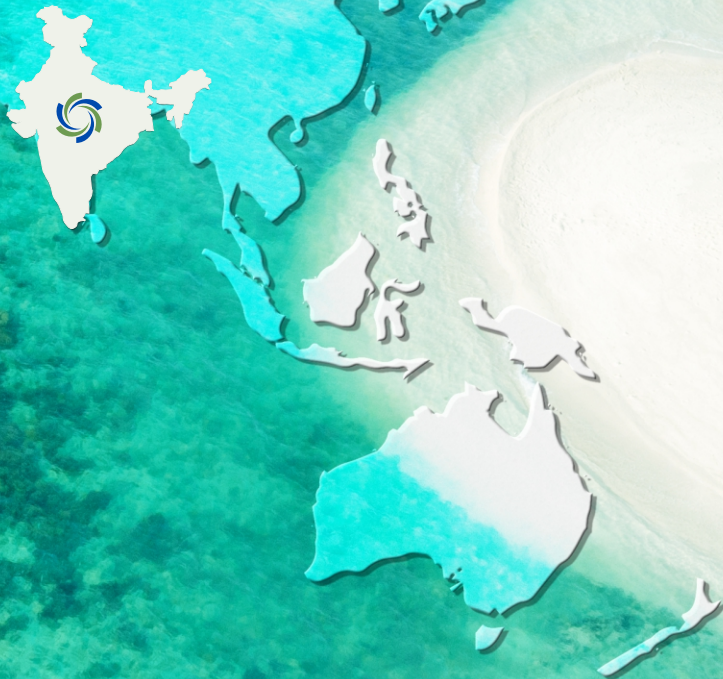

are some of the reasons
that could limit DHA
consumption to meet
people's daily requirement

NOW, EVERYONE
CAN BENEFIT FROM

DHA

To the world from India,

BIOSUS

DHA

Clean DHA from algal source

The future is smarter

THE FUTURE IS SMARTER

Biosus™ DHA is vegan, clean and naturally produced in triglyceride form that ensures high absorption, functional value and that too within reach.

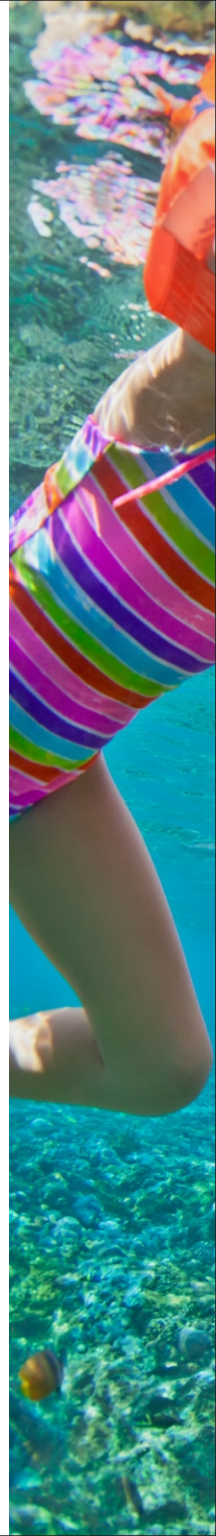

Source: Extracted from naturally derived, wild-type microalgae. Ensures high absorption, thanks to its clean, natural TG form.

Safety: Ideal for an early intervention in life; safe for supplementation during pregnancy and infancy.

Seasonality: Unlike fish oil, provides assurance of availability throughout the year.

Sustainability: Harmonious with nature and no harm to marine life

Helps meet the daily requirements of DHA making it an accessible and affordable alternative world over.

MICROALGAE FERMENTATION EXTRACTION REFINING OILS

GMO free

Sterile environment

Gentle process

Pure

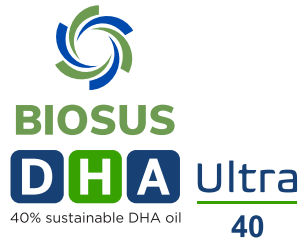

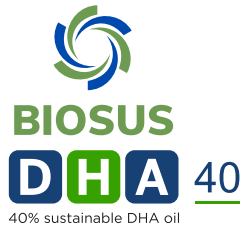

Safe

Full intergrated traceable production of Biosus™ DHA

PRODUCING A SUSTAINABLE DHA USING AN INDIGENOUS PROCESS
