

LYCOPENE

Portfolio

Divi's nature-identical Lycopene products are offered in several stable, finished forms to meet a wide range of formulation needs.

Lycopene, a member of the carotenoid family, occurs naturally in a number of fresh fruits and vegetables such as tomatoes, watermelon, pink grapefruit and papaya. It is an oil soluble red pigment with demonstrated strong antioxidant properties. As a powerful antioxidant, lycopene is thought to protect the body from harmful free radicals.

Lycopene

PRODUCT	MATRIX	APPLICATIONS

- USP
- Kosher/Halal forms available
- Products do not contain substances of known allergenic potential
- Gluten-free
- Non-GMO
- Shelf life – 36 months
- Country of origin – India
- E number –E160d
- pH-stable

DIVI'S SERVICE

- Analytical lab support
- Applications expertise
- Technical customer support
- Customized solutions
- Rapid response customer service
- Website documentation available
- Regulatory support

ABOUT DIVI'S

As a multinational company, Divi's Laboratories, has been serving the global pharmaceutical, nutraceutical and food markets for over 25 years. Our manufacturing facilities, located in India, are certified under ISO 9001, ISO 14001, OHSAS 18001, and FSSC 22000. The plants operate under HACCP guidelines with additional FDA inspection. As part of Divi's dedication to quality and innovation, a team of over 320 scientists make up our departments of Quality, Research & Development. This team provides support and collaboration with external partners, suppliers and customers.
