Studies on Capsifen® (Unpublished data)

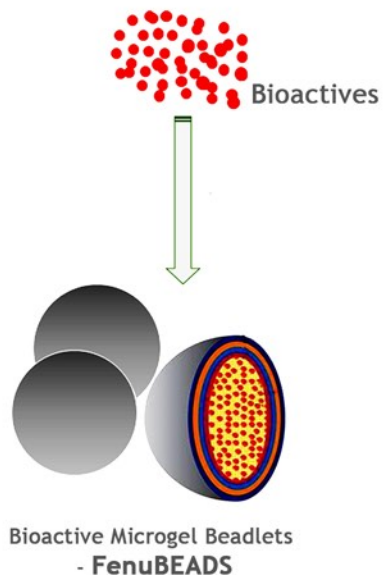

- ✓ Safe and sustained delivery of red chili pepper derived capsaicinoids using fenugreek (*Trigonella foenum graecum*) dietary fibre
- ✓ Safety assessment of Capsifen: a food-grade oral delivery formulation of red pepper extracted capsaicinoids
- ✓ Safety and tolerance of Capsifen - a randomized controlled study

FENUMAT™

FENUMAT™ is a 100% natural & food grade micronutrient delivery technology (patented) based on soluble dietary fibre (galactomannans) from fenugreek seeds. The unique chemical structure of fenugreek galactomannans makes it an ideal platform for loading both oils and hydrophobic molecules under optimised conditions. The water based process & absence of organic solvents & synthetic excipients distinguishes FenuMAT™ as the first commercially viable “GREEN approach in micronutrient delivery”.

Ultrasound mediated gel-phase dispersion of bioactives like capsaicinoids, curcumin, gingerol, boswellic acids, etc. in FENUMAT™ matrix provides a safe & sustained delivery with enhanced absorption.
