

Nedmag CaCl₂ Food

High purity food grade calcium
chloride from Europe

Trusted by leading food
producers worldwide.

NEDMAG
World of Magnesium

Produced in the Netherlands from European raw materials, our calcium chloride supports efficient food processing, stable product quality and reliable performance across a wide range of applications.

Cheese production

- Increases curd size and strength and acts as an effective coagulation aid
- Controls curd shrinkage and whey release for consistent yield and texture

Beer brewing

- Corrects mineral deficiencies and helps achieve optimal pH in brewing water
- Enhances flavour and improves yeast performance during fermentation

Fruits & Vegetables

- Maintains firmness, freshness and extends shelf life by strengthening cell structure

Pickles & Preservation

- Maintains texture and preserves products without increasing sodium content

Beverages

- Provides electrolytes and supports mineral balance in water and sports drinks

Reliable food grade calcium chloride from Europe

Nedmag is one of Europe's leading producers of calcium chloride with decades of experience in food applications. Our production in the Netherlands is carefully tailored to meet the high standards of the international food industry.

Why choose Nedmag CaCl₂ Food?

- High purity food grade quality
- European source and production
- Short lead times and reliable supply security
- Trusted by leading food manufacturers
- Produced under strict quality and food safety standards

Nedmag CaCl₂ Food is available in both liquid and solid form.
