

Inline capacities: 10 - 500L/h

Batch capacities: 2 - 1000kg

Applications

- Dairy & Plant-based
- Fats & Oils
- Alcoholic Drinks
- Nutraceuticals
- Carbonated Drinks
- Soups & Sauces
- Still Drinks / Juices
- Packaging Testing
- Ice Cream
- Education

Equipment

- Heat Treatment
- Deaeration
- Homogenization
- Batch Cooking
- Blending & Mixing
- Spray Drying
- Carbonation
- Filling & Closing
- Crystallization & Aeration
- Buffering
- Fermentation
- Cleaning-in-Place

About Us

Since 1993, OMVE has been committed to the design, assembly and supply of innovative process equipment for both R&D and QA departments in the sectors of liquid food, nutraceutical/pharmaceutical and chemical products. Today, with over 1500 systems installed around the globe, OMVE is the premier manufacturer of small-scale process equipment for liquid products.

What Do We Offer?

Our systems combine the flexibility and the scale required for lab and pilot applications with the reliability and performance of an industrial plant. They are designed to handle wide ranges of products and processes as a standard. Each configuration is based on standard modules that have a proven performance and have been validated during the development phase.

The modular configuration of our systems makes the upgrade of the machine possible at any time, enabling you to enter new markets with innovative products.

Service

Need a training or special assistance? Our experts are ready to assist you:

- via the help desk for information about your installation and remote diagnostics
- on-site through our range of customized services (tailor-made maintenance & training programs)

Test & Demonstration Center

You are always welcome to test your new products/processes and to experience our latest technologies at our Demonstration Center in the Netherlands.

References

Our clients include the major and most innovative companies in the beverage (plant-based proteins), flavor, ingredient, aroma, dairy and beer industries. We work with food industry machinery suppliers, simulating their installations on a small scale.

Why Partner with OMVE

Customized Process

Enables Scaling-Up

Highest Level of Automation

Aseptic Processing for Shelf-Stable Samples

Strategic Partnership

Minimum Waste per Test

Formulate with Accuracy

Validation

Our Vision

To make the food industry more innovative and sustainable by making product development easier and faster through exceptional process equipment and services.

Smart Pilot Plants for Quick Prototyping & Rapid Development

20L/h UHT Plant

60 Units/h Carbonated Beverages Plant

50L/h UHT Plant

100L/h Aseptic UHT Pilot Plant

30L/h Fermentation Plant

10L/h UHT Plant

15kg/h Crystallization Plant

10kg/h Spray Drying Pilot Plant
