

## FOOD & NUTRITION

---

We strive to partner with our customers to develop innovative solutions with an abundant variety of specialty ingredients and nutraceuticals to serve specific needs in dairy, culinary, seasonings, beverages, baked goods, confectionary, meat processing, dietary supplements and nutrition applications.

The end-to-end service we provide is not complete without the expertise and commitment to comply with the industry's increasing safety and quality requirements, as well as the ins-and-outs of local customs regulations.

We bring knowledge, creativity and service that build long lasting partnerships.

creativity beyond chemistry
