Willy Benecke.

**One of the world's top
suppliers of natural
raw materials.**

Hamburg-based firm Willy Benecke has been buying and selling natural gums and resins for the past 65 years. The company purchases these products straight from the countries of origin and selects its sources with great care.

In Hamburg, the goods are then inspected, stored and, for the most part, refined.

By virtue of its global logistics network, Willy Benecke is represented in more than 20 countries.

In Thorsten and Soeren Hauser, the family business is led by the third generation and stands for quality, continuity and reliability.

gum acacia powder*

Agglomerated spray-dried gum acacia powder

Gum acacia – German-made quality.

For almost thirty years, Willy Benecke has been producing spray-dried gum acacia powder in Germany.

The company is now amongst the leading suppliers on the global market and can be relied upon to have this natural resource available in outstanding quality. In order to be ready for the growing demands placed on the product, Willy Benecke has established a sister company in the form of SprayCom GmbH, based in the town of Wittenburg near Hamburg. SprayCom boasts a state-of-the-art facility for the production of spray-dried gum acacia with an annual capacity of 4,000 tonnes and own laboratory. SprayCom is FSSC-certified.

Gum acacia

**Gum acacia –
excellent, versatile,
natural and sustainable.**

Gum acacia (or gum arabic) is the dried exudate of the Acacia senegal tree and other related species. It's been recognised as a proven natural resource for food and a range of other applications ever since antiquity. Gum acacia is completely natural and GMO-free. It's also exceptionally sustainable, as the existence of these trees prevents the expansion of the Sahara. During the harvest season, gum acacia provides millions of people in the Sahel with a livelihood.

Willy Benecke continually strives for the preservation and expansion of this source of raw materials.

**Guar gum –
unrivalled quality from
Willy Benecke.**

The guar plant grows in the semi-arid regions of India and Pakistan. Careful selection of producers in the countries of origin and stringent quality control at our own laboratory make our guar gum an outstanding additive for the food and pharmaceutical industries, as well as for clients from a wide range of technical sectors.

Thanks to our long-standing connections and extensive experience in the direct import of guar gum, we can meet the most exacting quality requirements.

We do, of course, also offer organic varieties (DE-ÖKO-005).

Swift service.

High stock levels.

Tailored advice.

As a family business, Willy Benecke has flat hierarchies. The proprietors and their experienced staff are happy to provide tailored advice, ensure the prompt dispatch of samples, share their expertise and arrange for deliveries at short notice.

Our warehouse in the heart of Hamburg, which measures more than 7,000 m², ensures high availability for the majority of raw materials. Many raw materials, of course, are available in kosher, halal and certified organic varieties (DE-ÖKO-005).

Willy Benecke is certified against the globally recognized quality management standard FSSC 22000 and SEDEX certified since 2016.
