

# **Probi Digestis®**

The human digestive system – our guts – is teeming with bacteria, both good and bad. These microorganisms form a delicately balanced ecosystem, whose health is vital to our own. When the balance between our "good" and "bad" bacteria is disturbed, this ecosystem may become disrupted, leading to a less beneficial intestinal environment, which could contribute to digestive discomfort and other health issues.

Probi Digestis is based on *Lactiplantibacillus plantarum* 299v (LP299V®), a probiotic bacterium that is shown to support gastrointestinal health. The LP299V strain is one of the most well-documented probiotic bacteria in the world, with a robust safety and efficacy profile supported by more than 60 human clinical studies.

Probi Digestis is available for various solutions to meet different consumer needs. It is ideal for dietary supplements such as capsules, tablets, and stick-packs, as well as for functional foods such as beverages and powder products.

### SPECIFICATIONS

**Strain:** \**Lactiplantibacillus plantarum* 299v (LP299V®)

Origin: Human intestinal mucosa

**Documentation:** Multiple preclinical and clinical studies

Recommended daily dose: 10<sup>10</sup> CFU

**Safety:** GRAS and QPS status, safe history of use in commercial food products and dietary supplements

\* Due to the recent taxonomic reclassification of the *Lactobacillus* genus, some naming has changed.

### PROVEN BENEFITS\*

- Supports general gastrointestinal health
- May help reduce abdominal pain
- May lessen bloating
- May help reduce gas formation
- Supports normal stool frequency
- \* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or nevent any disease

### PART OF PROBI CLINBAC™

Probi ClinBac is an exclusive range of clinically proven and patented health concepts based on specific probiotic strains. These concepts are backed by comprehensive dossiers that include documented health benefits, as well as demonstrated efficacy and safety profiles, replicated in multiple clinical trials. The Probi ClinBac range addresses several major health areas, including the first-ever probiotic designed to support bone health.

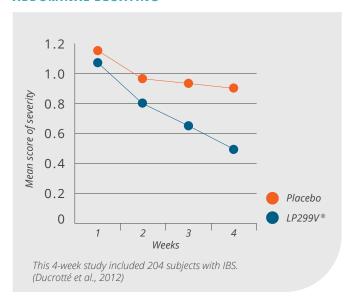

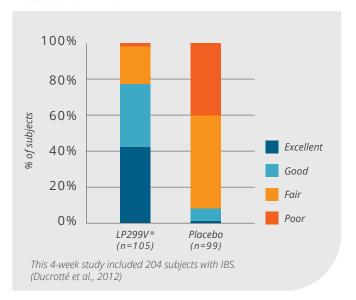

# Probi Digestis® is one of the world's most thoroughly tested probiotics.

The discovery and characterization of the LP299V® strain is based on the research of more than 200 scientists, tested in more than 60 human clinical studies, and documented in more than 170 publications. Probi Digestis has demonstrated clinical efficacy in multiple randomized, double-blind, placebo-controlled gastrointestinal studies ranging from 40–200 subjects.

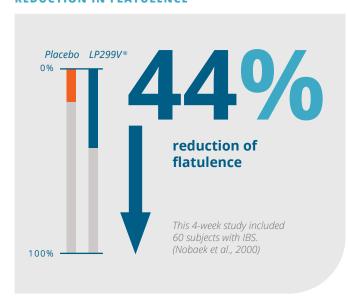

# SIGNIFICANTLY LESS SEVERE ABDOMINAL BLOATING

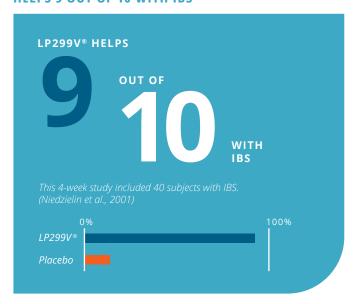

# 78% OF THE SUBJECTS RATED THE EFFICACY AS GOOD OR EXCELLENT

## REDUCTION IN FLATULENCE

## HELPS 9 OUT OF 10 WITH IBS
