

Antioxidant and
immune support

A woman with long hair, wearing a white, sleeveless, flared dress, stands on a sandy beach. She is facing away from the camera, with her arms outstretched to the sides. The background shows the ocean with gentle waves and a bright, hazy sunset sky. The overall color palette is warm and golden.

VITATABS®
LIPOSOMI C DUO

EFFECTIVE COMBINATION
of fat-soluble liposomal vitamin C
and water-soluble vitamin C

VITATABS® Liposomi C Duo

**For skin, vascular and nervous system,
fatigue and exhaustion.**

Though Vitamin C is a very ordinary compound, it is essential for the proper function of our immune system. Vitatabs® Liposomi C Duo, provides a unique combination of fat-soluble liposomal vitamin C and water-soluble vitamin C, which are absorbed into the body by various routes enabling very efficient absorption. Vitamin C is essential for the collagen production that helps maintaining healthy skin, gums, teeth and blood vessels. Vitamin C promotes normal functions of the nervous system and improved absorption of iron. Vitamin C also decreases tiredness and exhaustion, and gives more energy for everyday life.

1 capsule contains: Vitamin C 400 mg

Dosage: 1 capsule per day
with plenty of liquid.

Free from lactose, yeast, sweeteners
and gluten. Vegan.

Made in Finland.

Liposomal vitamin C is vitamin C encapsulated in a fat-soluble liposome. The liposome is surrounded by a lipid bilayer in which the water-soluble portions of the fatty acid are on the outer surfaces of the hollow lipid sphere and the fat-soluble portions are on the inner surface of the cell membrane. Liposome structure protects vitamin C in stomach and intestines and active ingredients are absorbed intact, without need of energy. Water-soluble vitamin C and liposomal vitamin C are absorbed in the body by using different mechanisms which guarantees the most effective absorption.

LipoCellTech™ uses the most advanced production method in producing the liposomal vitamin C powder. The production method imitates the nature and only pure ingredients are used. Heat, high pressure, or chemicals are not used during the production process. This ensures that the body recognizes the liposomal products as its own material, enabling almost complete absorption in the body.
