ABOUT BIOFORTIS

Biofortis is a unique full-service CRO providing Nutrition Clinical Trials, Microbiome Investigation and Data Science for Human and Animal Health.

OUR EXPERTISE

- Recognized in nutrition clinical trials and microbiome investigations
- Highly experienced multi-disciplinary team
- Dedicated Biometrics & Data Science internal expertise
- Strong network of scientists and medical experts
- Biofortis' strategic and scientific advisory board
- Partner in large Research Consortia Projects
- Internal R&D developments
- Contract Research in partnership with our customers

OUR CAPABILITIES

- Two clinical investigations units
- Internal Central Laboratory
- Cutting-edge NGS platform
- International network of partners (labs and investigational sites)

OUR ADDED VALUE

- One-stop-shop solution
- One single coordinator for all the steps of your project
- From standard services to custom approaches

OUR OFFER

MICROBIOME

Pioneer in the microbiome field, Biofortis accelerates project development through its expert team and cutting-edge NGS tools. This sequencing platform, combined with a Central Laboratory and bioinformatic expertise, offers you a large panel of host biomarker associated with the microbiome.

- SAMPLE SOURCING AND KIT SUPPLY**
- WGS OF BACTERIAL ISOLATES**
- METABARCODING 16S**
- SHOTGUN METAGENOMICS**
- BIOINFORMATICS**
- MICROBIOME ASSOCIATED BIOMARKERS**
- KOL NETWORK**

CLINICAL TRIALS

From study design and protocol writing to reports and publications, Biofortis manages all steps of clinical trials to assess efficacy, tolerance and safety of products. Based on its internal Clinical Investigation Units and an international network of key partners, Biofortis as SMO can accompany you in complex multi-centric trials.

- STUDY DESIGN AND FEASIBILITY**
- REGULATORY SUPPORT**
- VOLUNTEER RECRUITMENT**
- CLINICAL TRIAL COORDINATION**
- DATA MANAGEMENT & BIOSTATISTICS**
- SCIENTIFIC AND MEDICAL WRITING**

CENTRAL LAB

Our Central Lab routinely supports 100+ investigation sites worldwide for sampling kits, sample logistics, study documentation, centralized analyses with hundreds of biological parameters in our catalog, and biobanking services.

- CLINICAL / PRECLINICAL**
- FROM KIT SUPPLY / LOGISTICS TO DATA DELIVERY**
- WORLDWIDE NETWORK OF LAB PARTNERS**

DATA SCIENCE

Using exploratory approaches leveraged by machine learning, our team works to value the potential benefits observed in your clinical research, by characterizing the best responders or biomarkers, identifying new marketing insights from discovered hidden patterns, and by learning how to optimize a future clinical trial design.

- MULTI-SOURCE DATA INTEGRATION**
- MAXIMISE RETURN OF INVESTMENT**
- DE-RISK YOUR FUTURE CLINICAL TRIAL**
- DATA VALUATION OF PAST PROJECTS**
