WE ARE NOT JUST AN INGREDIENT SUPPLIER

OUR METHOD OF ANALYSIS

TECHNICAL CENTRE

Bio-Med Ingredients cares about the quality of final products for the end user. We have a state-of-the-art quality control laboratory equipped with high precision testing equipment like: AAS (Atomic Absorption Spectroscopy), HPLC, Gas Chromatography, GCMS, UV-spectrometer, Karl-Fischer water testing, etc.

All testing equipment is calibrated periodically by an external agency.

Bio-Med Ingredients provides a technical dossier which consists of testing methods, specifications, working standards and chromatograms upon request to end customers, and also assists them for any technical queries.

RESEARCH & DEVELOPMENT

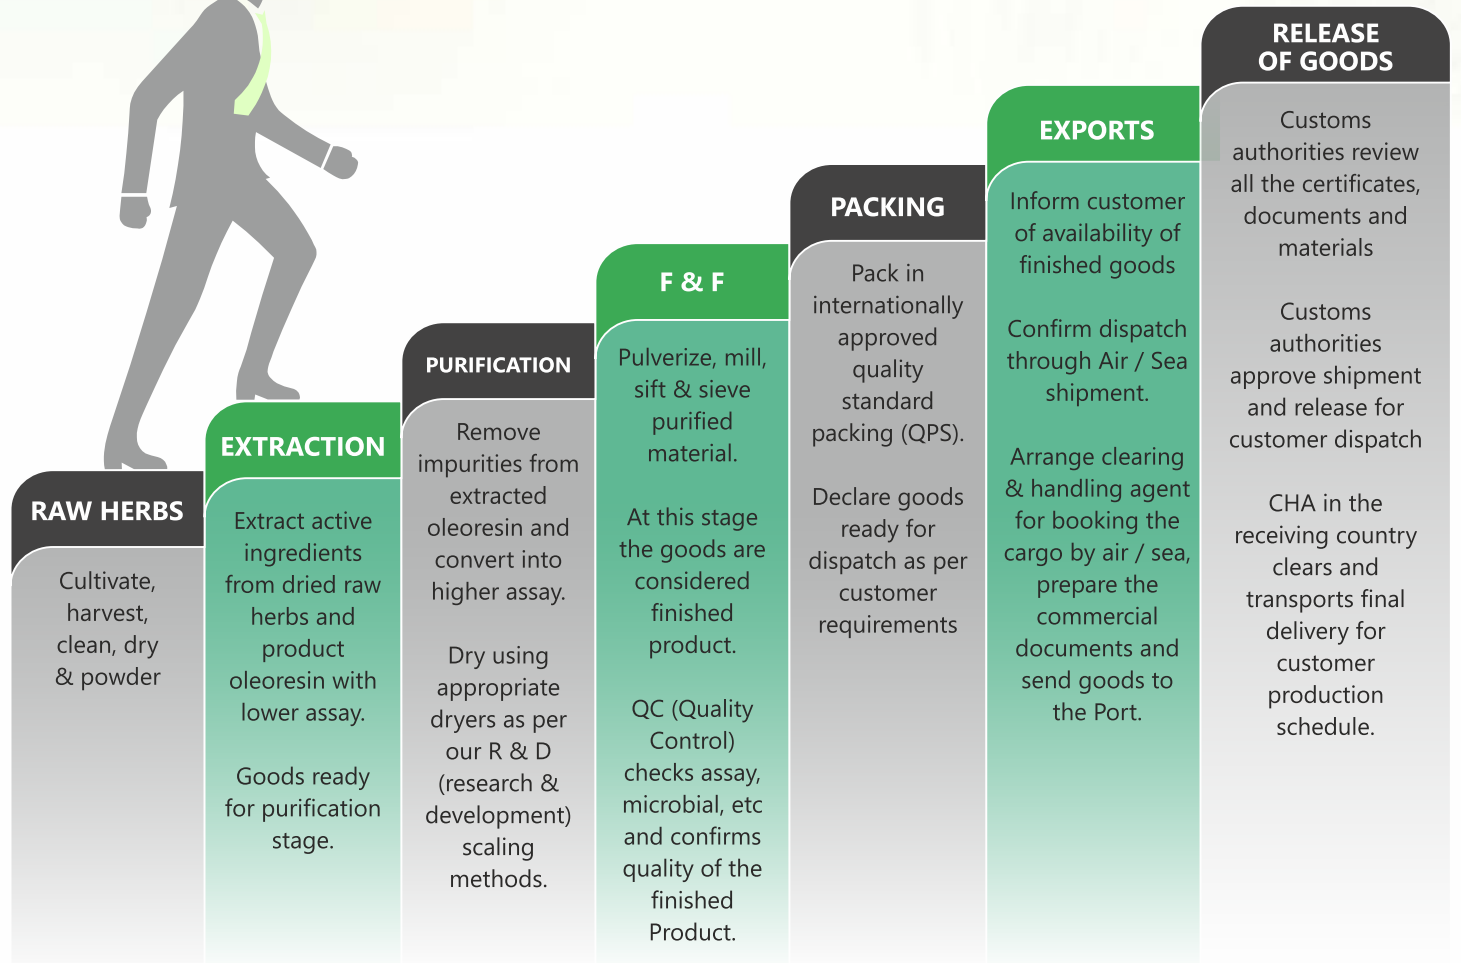

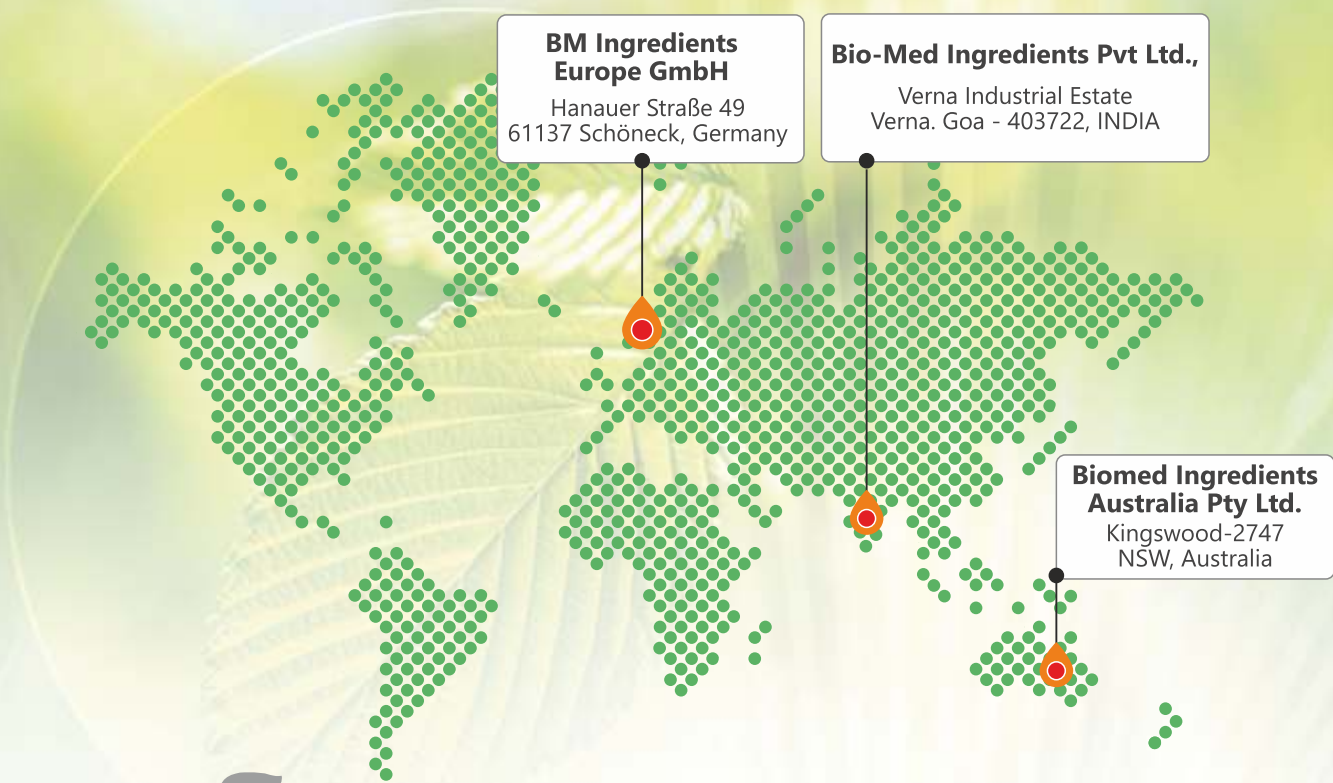

Bio-Med believes R & D is an important means for achieving future growth and maintaining a relevant product in the market.

We aim to determine methods to address specific customer industry needs and requirements.

These investigations are all focused on specific commercial objectives regarding products and processing. The findings of research are then utilized for the production of specific products including material, systems and methods. Design and development of prototypes generate requisite knowledge and processes to execute commercial products.
