- Improved Visceral Adiposity Index
- Significantly improved serum lipids
- Enhanced user mood
- Weight and inches reduction in both women and men
- Results seen in core: waist and hips
- Water-dispersible form available
- Patented

CALORIE BURNING ON DAY ONE. SIGNIFICANT WEIGHT LOSS AT DAY 14.

SLENDACOR has been studied in three human clinical trials to date – along with multiple pre-clinical studies. The design and results of this research offer a range of significant opportunities for your weight management product messaging. Study participants included both men and women. Subjects were of a broad age range and included a healthy population of overweight, not obese, individuals, adding confidence to results in the general population. Calorie burning effects were seen on the first day of study. Significant weight loss was seen on Day 14, continuing throughout the duration of the study. The research shows statistically significant slimming – with a reduction in waist circumference and no reduction in lean body mass. Serum lipids and the Visceral Adiposity Index improved. In a 2021 study, calorie burning effects were seen on the first day and the mood of study participants improved.

**Compared to diet and exercise alone, the data on SLENDACOR shows:*

Safety

All constituents of this patented ingredient are derived from commonly used culinary herbs and also have been shown to be safe by multiple toxicity studies.

* THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE.
