:always natural

Global. Sustainable. Innovative.

Natural raw materials, and special ingredients derived from them, have been our driving force for more than 120 years. Norevo is an internationally operating company with headquarters in Hamburg (Germany), specialised in trade and processing of natural raw materials.

Our subsidiaries in Hungary, Mexico, Argentina, China and Singapore provide a global consulting and service team.

Agave and honey from Mexico

Acting in fair partnership

We have been working with our raw material producers in a fair partnership spirit, and in many cases for several generations already. We are on site – because this is the only way to ensure that raw materials are produced at highest quality and ecologically sustainable in the origin.

Our international sites ensure a reliable, worldwide supply chain and optimized logistics to our customers' core markets.

Johannes Wolff, CEO

“Naturalness is more than a trend for us – it is in our DNA”

Natural raw materials re-invented

Natural, clean and sustainably produced raw materials are the basis on which we produce our ingredients for our industry partners. We process and refine our natural ingredients to make them available at the highest quality.

Sweets, cosmetics or pharmaceuticals: our raw materials improve other products.

Waxes from Brasil

BIO MANY OF OUR PRODUCTS ARE CERTIFIED-ORGANIC. norevo.de/en/certifications

The whole world of Norevo

The properties of our natural raw materials are as versatile as the products made from them. Norevo develops new and innovative solutions for improved finished products.

GUM ACACIA

The gold from the acacia tree

- Quickly soluble powder (Quick Gum)
- Milled powders
- Pieces
- Granules

CONFECTIONERY PERFORMERS

Functional ingredients for the production of sweets

- Pre-coating agents
- Whitening agents
- Polishing- and sealing agents
- Effect coatings
- Texturisers
- Anti-sticking and oiling agents
- Souring agents

AGAVE SYRUP

Concentrated sweetness from nature

- Light quality
- Dark quality
- Powder

AGAR AGAR

Natural gelling agent from the Atlantic

- Powder

HONEY AND BEE PRODUCTS

The best from the beehive

- Raw honey
- Special honey types
- Standardised honey blends
- Individual honey blends
- Germ-reduced (low-bac) honey quality
- Honey powder
- Royal Jelly
- Bee pollen

WAXES AND OILS

A diverse natural solution

LICORICE EXTRACT

Black gold from the licorice root

- Blocks
- Powder
- Granules
- Paste
- Low-dust powder

Applications in all areas

Honey, licorice extract, gum acacia or other fine raw materials – the quality and pureness of our products meet the high standards of the food-, confectionery-, pharmā- and cosmetic industry.

CONFECTIONERY

Confectionery Performers, honey, gum acacia, agar agar, licorice extract, agave syrup

Functionalities

- Hydrocolloids
- Coating agents
- Polishing- and sealing agents
- Anti-sticking and releasing agents
- Sweetening and flavouring ingredients
- Texturiser and stabiliser

PHARMA

Gum acacia, honey, licorice extract, agar agar, waxes, agave syrup

Functionalities

- Film-building, binding and stabilising agents for emulsions
- Sealing agents for tablets
- Micro-encapsulation
- Texturiser

BEVERAGES

Honey, gum acacia, agave syrup, licorice extract

Functionalities

- Stabiliser, Emulsifier
- Sweetening and flavouring ingredients
- Micro-encapsulation for beverage flavours

COSMETICS

Waxes, honey, gum acacia, royal jelly, agar agar

Functionalities

- Film-building, binding and stabilising agents for emulsions
- Humectant
- Texturiser
- Nourishing ingredients

BAKERY, DAIRY & OTHER FOODS

Honey, licorice extract, gum acacia, agar agar, agave syrup, royal jelly

Functionalities

- Stabiliser and binding agent
- Texturiser, gelling agent
- Sweetening and flavouring ingredients

NON-FOOD

Gum acacia, waxes, licorice extract

For application in:

- Candles
- Polishes
- Adhesives
- Paint and coatings
- Further technical applications

Providing individual solutions

International trends, new industries and possibilities to apply our natural raw materials constantly drive us to search for innovative concepts.

We offer comprehensive consulting around the application and functionalities of our natural raw materials. This includes the development of tailor-made, functional ingredients for the confectionery industry.

In close cooperation with our customers, we analyse product properties and production processes in order to achieve optimal results.

Our in-house laboratory allows us to meet the highest quality requirements through modern analysis methods.

Individual solutions and consulting to meet customer-specific product requirements and challenges are created from our comprehensive trade know-how.

Knowledge emerges from sharing

The characteristics of our natural raw materials are as diverse as the finished products that are made from them. Handling raw materials requires years of experience and expertise.

We share our knowledge in seminars and workshops for raw materials, their processing and their specific properties and production processes.

Focusing on People and Nature

A respectful co-existence with our fellow human beings and a resource-conserving treatment of nature guarantees tomorrow's availability of natural raw materials for our daily lives.

Environmental and Climate Protection

As of today, Norevo GmbH and its production facility in Möhnsen is powered 100 percent by renewable electricity. We have set ourselves the short-term goal of reducing our CO2 emissions by 75 percent by 2025.

Social Responsibility

We understand sustainability as social task, particularly in those countries where we are active. Internationally, we support various social initiatives for improved health, education and security.

Corporate Governance and Supply Chains

Certifications, sustainable procurement, transparent supply chains and a worldwide, gapless compliance is a central task of our corporate management, and we strive to exceed existing standards.
