

GOAT & SHEEP INGREDIENTS

WE ARE DAIRY

www.valfoo.com

Why Valfoo?

Valfoo offers a wide range of goat and sheep dairy ingredients which are carefully produced from our own milk and whey raw materials. We have put our focus on goat and sheep ingredients for over half a decade and have developed a reliable and fully traceable supply chain. All raw materials are carefully selected to ensure the highest possible degree of quality, food security and animal welfare.

Through our traceable supply chain and strict quality control, our goat and sheep products meet the highest requirements.

Strategic partnerships

For years, we have been continuously developing our goat and sheep range and strengthening our close partnerships with specialised farms and processing plants in Europe. With our partners, we have long-term contracts to ensure a stable supply of goat and sheep ingredients. Through this we can guarantee a fully traceable supply chain and guaranteed high-end processing of our valuable raw materials.

With our know-how and network, we consistently offer manufacturing sites an innovative combination of quality raw materials and processing technologies to maximise productivity and capabilities.

We are PIONEER and LEADING EUROPEAN SUPPLIER of goat & sheep ingredients.

1. The fresh raw milk is collected at affiliated farms everyday

2. The milk is delivered to the processing plants

3. Valfoo processes the fresh milk into various powder ingredients

4. The quality team ensures that the quality meets the highest standards

5. Valfoo delivers the freshly produced powder to customers

6. Customers produce end-products with our premium dairy ingredients

Health benefits

Quality assurance

Quality management and control are a fundamental part of Valfoo's modern production process. Valfoo guarantees a reliable selection of raw materials and processing plants through three important steps:

**Regular site visits
& audits**

**Strict
monitoring**

**Microbiological
analysis**

Not only does Valfoo have its quality team ensure the quality of its products; we also require all our partners, both farms and processing plants, to be certified as complying with international standards.
