Creatine Series

What is Creatine?

Creatine is a nitrogenous compound stored in the muscle of mammals and fish, 95% of which is stored in skeletal muscle (making animal meat an excellent dietary source), but a small number (half a kilogram of meat can only provide 1 grams of creatine).

In humans, 60% is creatine phosphate (PCr) and 40% is creatine. To reach 5 grams of daily intake of help to the human body, you must eat 2.5 kilograms of meat every day, which is not possible, so it needs to be added.

Benefits

Relieve muscle fatigue and restore physical strength

Increase muscle elasticity and make muscles stronger

Creatine monohydrate

Creatine Monohydrate 200 mesh
Creatine Monohydrate 80 mesh

The most popular and effective fitness supplement on the market today because it can quickly increase muscle size and strength.

Anhydrous Creatine

Anhydrous Creatine is distinguished by its exceptional solubility, rapid absorption, and reduced moisture sensitivity, making it highly efficient and user-friendly.

Creatine HCL

Creatine Hydrochloride stands out for its superior water solubility, stability, and potential ease of digestion, offering effective results with lower dosages.

Carnitine Series

| Product | Features | Distinguishing Points |
|----------------------|--|--|
| L-Carnitine Base | Basic form of L-Carnitine that helps convert fat into energy, promoting fat metabolism and enhancing endurance. | The fundamental form of L-Carnitine, typically used for basic fat metabolism support without additional chemical structures. |
| L-Carnitine Tartrate | Good solubility, easy absorption, and is known to provide energy, reduce muscle fatigue, and enhance athletic performance. | More readily absorbed and is commonly used for enhancing athletic performance and endurance. |
| Acetyl L-Carnitine | An acetylated form of L-Carnitine that can cross the blood-brain barrier, supporting brain function and cognition, while also offering benefits in fat metabolism and energy production. | Not only supports fat metabolism but also provides unique benefits related to brain function and cognition, making it suitable for brain health and cognitive support. |

Food Grade Carnitine Series

- Reduce weight
- Strengthen immunity
- Anti fatigue / anti-aging
- Cardiovascular health care

Whey Protein

Whey Protein known as the king of protein, extracted from the milk of a protein with high nutritional value, easy to digest absorption characteristics with a variety of active ingredients. It is recognized as one of the human body of high quality protein supplements.

Whey Protein powder contains the complete spectrum of amino acids your body needs for quick muscle recovery after a brisk workout.

| Product | Features | Our Advantages |
|--------------------------|--|--|
| Whey Protein Concentrate | Typically contains 80% protein | Our Whey Protein is locally sourced in Europe, maintaining high quality and natural properties, suitable for those seeking a natural protein source. |
| Whey Protein Isolate | Typically containing over 90% protein | |
| Whey Protein Hydrolysate | Easier digestion and absorption; No lactose. | |

Increase immunity

Boosts Body's energy level

Help man muscle improve

Health skin care

Improve bone density

Plant-Based Protein

In the entire alternative protein market, plant-based protein has consistently been the center of market attention. Data indicates that the global market size of plant-based protein is projected to grow at a compound annual growth rate of 15.0% annually, reaching \$27.9 billion by the year 2025.

| Pea Protein | Rice/Brown Rice Protein |
|---|---|
| <ul style="list-style-type: none"> An all-natural plant-based protein, gluten-free, and lactose-free, making it friendly for vegetarians and those with dairy allergies. Rich Amino Acids: Abundant in essential amino acids like lysine and arginine, supporting muscle growth and recovery. | <ul style="list-style-type: none"> Compared to Soy Protein, Rice Protein has better emulsification and foam stability. Rice Protein also has better digestibility and absorption compared to Whey, Soy, Milk, Wheat and Casein. Nutritional Value: Rich in quality amino acids, particularly lysine, which supports muscle growth and repair. |

Product Applications

- Protein Beverage
- Nutrition Supplement
- Meat Industry
- Feed Ingredients (Brown Rice)

Amino Acids

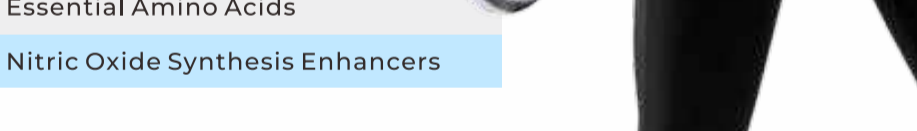

Our amino acid product line not only meets your dietary needs but also brings significant benefits to your sports nutrition product line. These amino acids are key components for enhancing energy, promoting muscle growth, and aiding in recovery, contributing to improved athletic performance and endurance.

| | | |
|------------------------------|------------------------------------|----------------------------------|
| Pre-Workout Supplementation | Beta-Alanine | Energy and Endurance Enhancement |
| | L-Citrulline DL-Malate 2:1 | |
| | L-Arginine AKG 2:1 | |
| | Taurine | |
| Post-Workout Supplementation | BCAA 2:1:1 | Branched-Chain Amino Acids |
| | L-Ornithine | Other |
| | L-Glutamine | Muscle Growth and Repair |
| | L-lysine | |
| | L-Leucine(DC/Fermentation/Instant) | Essential Amino Acids |
| | EAA | |
| L-Arginine Base | Nitric Oxide Synthesis Enhancers | |

Functional Ingredients

The "Functional Ingredients" product line brings together a variety of natural herbal extracts, plant-based food ingredients, and biologically active molecules, each with its unique health benefits. These ingredients find applications in different domains, catering to a wide range of consumer needs.

| | | | |
|-------------------------------|-----------------------------|--|--|
| Herbal Extracts | Ginseng Extract | | Enhances Energy; Combats Fatigue; Boosts Immune System |
| | Echinacea Extract | | Strengthen Immune system |
| | Valerian Extract | | Reduce Stress; Enhance Sleep Quality |
| | Tribulus terrestris Extract | | Enhance Performance; Increase Muscle Mass |
| | Boswellia Serrata Extract | | Anti-Inflammatory; Antioxidant Properties |
| | Turmeric Extract | | Anti-Inflammatory |
| Plant-Based Food Ingredients | Maca Powder | | Boost Energy Levels; Enhance Performance; Combat Fatigue |
| | Artichoke Extract | | Liver Health |
| | Milk Thistle Extract | | Liver Protection |
| Biologically Active Molecules | Hyaluronic Acid | | Skincare; Anti-aging |
