Quality & Safety

At Aplantis we are dedicated to providing our customers with the highest quality natural raw ingredients. With Aplantis Quality Seal, we ensure that high standards of quality & safety are met at every step of the supply chain through consistent control of our producers and traded products.

Certifications

The Aplantis Quality Seal is more than just words - we back it up with concrete measures & certifications. We have HACCP, ISO9001, GMP+ and Organic certificates, which demonstrate our continuous commitment to the highest standards of quality, food safety and environmental sustainability.

In-House Sampling, Laboratory & Warehouse

In contrast to many other raw material traders, Aplantis has integrated warehouse and two laboratory/clean rooms. This allows us to carry out incoming goods inspection and a representative sample train - directly on site. We examine for critical parameters & contaminants as well as for authenticity (assay, ID) and food fraud.
