FERMLAND BIO

Innovate For Healthy Immune

About us:

Fermland Bio is a company owned by Fermland group and aims to deliver the broadest portfolio of health and wellness solutions to meet consumer's evolving functional nutritional requirements. Since our founding in 1987, starting from a regional ingredient company to a global leader in human and animal nutrition. We at Fermland Bio India not only develop improved probiotic to support human well being but also offer a wide range of products from therapeutic, dairy, food, animal, aqua and agriculture sectors.

We combine functional expertise with in-depth knowledge and have excellent relationship in the Indian market. Our unwavering commitment to excellence and proficiency in managing the stable, live bacteria from R&D through every stage of the manufacturing process to marketing are consistent, of highest quality and supported by robust clinical documentation. Our products are produced in compliance with Good Manufacturing Practices (GMPs) and third-party quality certifications.

What we offer:

We provide innovative products and services contributing towards enrichment and well being across the globe for better health:

- Fermland Bio is a leading Probiotic manufacturer and supplier company, additionally we develop natural ingredient solutions for the nutritional, pharmaceutical, food and agricultural industries.
- We offer a comprehensive range of goods and services which are research-driven and has led to creation of a network of Global Technology & Innovation Centers and Regional Development & Applications Centre. These centers constantly evaluate new health areas in probiotics in collaboration with both independent university groups and/or industry partners and provide insights to drive clinically proven innovative products.

Probiotics:

"Live microorganisms that, when administered in adequate amounts, confer a health benefit on the host". Our probiotics are characterized strains with specific identity, potency and have a scientifically demonstrated effect on health. Fermland Bio has specialization in manufacturing and customization of blends of probiotic cultures with years of experience. We supply a wide range of single cultures which includes almost all the cultures recognized as GRAS. Our probiotic cultures are provided into capsule and sachet manufacturing with best available stability and shelf life to our customers across the globe.

PROBIOTIC MICROBIAL CULTURES AVAILABLE WITH US:

Providing world class probiotics as human health care supplements and for animal feed applications
