

# Sustainable Natural Astaxanthin

## Icelandic Purity

### Unmatched Icelandic Purity

Iceland has one of the cleanest environments in the world, and Algalif benefits from an abundance of pure, unchlorinated freshwater—naturally filtered through layers of volcanic rock. This pristine environment provides the ideal foundation for producing high-quality microalgae products with exceptional cleanliness, free from heavy metals and other unwanted contaminants.

## Sustainability

### Sustainability and Next-Level Technology

Algalif is an internationally awarded industry leader in the production of high-quality natural astaxanthin. Powered entirely by Iceland’s green geothermal energy, and as a **Certified Carbon Neutral Company**, Algalif is deeply committed to responsible production, environmental care, and long-term sustainability. All microalgae cultivation takes place in fully closed, state-of-the-art photobioreactor systems—ensuring consistent and exceptional product quality, safety, and purity.

## Health Benefits

### Science-Backed Health Benefits from a Superior Antioxidant

Natural astaxanthin is one of the most powerful antioxidants commercially available as a raw ingredient for nutraceuticals. Supported by thousands of peer-reviewed scientific publications and more than 100 human clinical studies, natural astaxanthin has demonstrated strong antioxidant and anti-inflammatory properties. It supports, among other things, **eye, brain, skin, and joint health**, as well as **endurance, muscle recovery, cardiovascular health, and immune function**—promoting overall wellness and vitality.

## Product Range

Grade	Concentration	Form	MOQ
<b>NEW</b> Astalif 20	20%	Oleoresin	10 kg

# Product Innovation

Our product innovation is rooted in scientific research, advanced microalgae technology and continuous improvement.

## Astalif 20

20% Oleoresin

NEW

### More astaxanthin power in less space

Made possible by Algalif's proprietary quality cultivation and extraction methods, Icelandic purity, and renewable geothermal energy, we now offer a standardized 20% astaxanthin oleoresin of the highest quality.

Astalif™ 20 delivers a high concentration of natural astaxanthin for advanced formulations—allowing smaller capsules to achieve the same daily dosage.

## Astalif 15

15% Oleoresin

NEW

### High-performance astaxanthin for flexible formulations

For greater capsule size flexibility, Astalif™ 15 offers a concentrated source of natural astaxanthin, ideal for a wide range of nutraceutical applications and formulations.

Produced using Algalif's proprietary cultivation and extraction methods, Icelandic purity, and renewable geothermal energy—ensuring consistent quality and excellent formulation compatibility.

## AstaBead™

CWD 5%

### Compact and stable powder for various applications

AstaBead™ 5 delivers a high-potency source of natural astaxanthin that is both cold-water dispersible and compressible, provided in a unique 5% beadlet format.

Its versatile design makes it suitable for a wide range of dry delivery systems, including tablets, hard capsules, powdered blends, functional foods, and instant beverages. With exceptional stability and advanced performance, AstaBead™ 5 is a premium solution within the dry astaxanthin category.

## Other Brands

### Premium Ingredients

Astalif™, Iceland Harvest™ and Nutramunity™ combine Icelandic purity and science to provide high-quality microalgae and beta-glucan ingredients for health and wellbeing.
