

For over two years, the HEMPEAT brand has been steadily building its position on the market, supplying innovative products to both retail and HoReCa channels.

Hempeat is not meat.

It is a modern, plant based alternative made from hemp seeds — created with deep respect for animals, people, and nature.

What makes Hempeat exceptional is its **authentic meat like taste and texture**. Whether served as a juicy burger, tender pulled “pork,” or a flavorful meatballs, Hempeat consistently delivers:

- rich, satisfying taste
- meaty texture
- natural juiciness
- high nutritional value

Hempeat looks, feels, and tastes like real meat — so much so that it’s **hard to tell the difference**.

All the pleasure of meat. 100% plant based.

From HEMPEAT to Chill Animals Club – New Brand Look

We are continuing to grow, with an increasing focus on retail shelves — the place where taste matters, but where emotion and first impression often make the final decision.

Chill Animals Club is a cheerful and distinctive brand concept that tells the story of animals enjoying life, relaxing, and following their passions — because they didn’t end up on a plate. Every product has its own unique animal character, creating a strong visual identity and an immediate emotional connection with consumers.

This communication is designed for everyone — not only vegans and vegetarians, but also flexitarians and meat eaters who are open to trying plant-based alternatives.

Eye-catching, animal-led packaging helps the products stand out on the shelf, spark curiosity, and invite consumers to make a positive, delicious choice.
