

About us !

Phinn® is the scientific and regulatory database developed by our Pharmedgeer Development experts.

This simple and intuitive tool helps you each day to **INNOVATE**, **CHECK**, and **FIND INFORMATION** in the field of health and nutrition.

REGULATORY SUPPORT

A tool to **FOLLOW** and **ANTICIPATE** the regulations of the Member States and third countries (nearly 60 country sheets) and **CHECK** the conformity of more than 2700 functional ingredients and additives; health claims, effectiveness, safety and requalification...

SCIENTIFIC SUPPORT

A tool to help you **JUSTIFY** your claims by accessing clinical studies, EFSA's opinions and scientific reports and **CONTROL** the risks (safety, medicines, Novel Food).

MARKETING SUPPORT

A tool connected to Compl'alim to help you **MONITOR** and **ANALYSE** formulations, communications, the market position of your competitors, etc., as well as the evolution of the food supplements market in France in real-time.

R&D SUPPORT

SOURCE your raw materials in a few clicks from the supplier database and **DEVELOP** your new formulae.

"MY FORMULAS" MODULE

What is the "My Formulas" module ?

It's a tool integrated with our PHINN® scientific and regulatory database, which simplifies the verification of regulatory compliance of formulas, the generation of labeling and audit reports, and keeps you informed of regulatory changes.

The advantages of the "My Formulas" module ?

- Compose your formula on the interface.
- Regulatory validation is automatic.
- Edit your product labels.
- Receive notifications of regulatory changes.

How to use the "My Formulas" module ?

- **Complete support** : Regulatory expertise.
- **Rapidity** : Facilitated decision-making.
- **Automatic evaluation** : Time-saving.
- **Ease of use** : Intuitive interface.
