

SCIENTIFIC AND REGULATORY CONSULTING

Secure the development of your animal hygiene products

From formulation to market launch. Support at every key stage: ingredient selection, claims validation, technical documentation and labeling.

Anticipate requirements, reduce risks and facilitate commercialization!

OUR ADDED VALUE

- Cosmetic expertise applied to animal hygiene.
- Full command of CLP requirements.
- An in-house toxicologist within the team.
- Support on product safety and European compliance.
- Review of messages and materials, with identification and management of reclassification risks.

OUR SERVICES

- Formula compliance validation
- Regulatory positioning analysis
- Labeling and communication audit
- Safety assessment for the animal and the human user
- Preparation of the finished product technical dossier
- Regulatory notifications if required

Let's discuss your animal hygiene product projects and your needs.
