

Introducing Digestive Performance™

New White Space
in Digestion

The Innovation the Digestive
Category Has Been Missing

digexin®

Digestive Performance™

Improving peristalsis, transit time, and gut integrity means physical comfort and regularity. Be free of bloating, gas, constipation, and digestive distress.

Digexin Gives You Confidence and Comfort

PERISTALSIS & TRANSIT TIME

4 hours

Faster

Improved digestive motility

Faster, more complete bowel movement transit

Clinically measured via Blue Poo Test

CONSTIPATION NORMALIZED

98%

Symptom Reduction

Reduced straining and incomplete evacuation

Improved stool frequency and comfort

Benefits observed within 7 days

PREBIOTIC ACTIVITY

44%

Increase in butyrate production*

Improves the microbiome without fiber or live bacteria

Promotes an environment where healthy bacteria flourish

Increases SCFA fermentation production

**Ex vivo human colon simulation*

Backed by double-blind, placebo-controlled human clinical trials
Ex vivo microbiome data from ProDigest® Colon-on-a-Plate® model pending publication.

New Study with GLP-1 users

Reduction in GI Symptoms

Digexin significantly reduced GI side effects associated with GLP-1 agonist use, including constipation, heartburn, and vomiting.

In a recently completed clinical study with GLP-1 users, Digexin significantly reduced GI complaints associated with GLP-1 agonist use, including constipation, heartburn, and vomiting.

Study highlights included:

- Supports GI comfort and function in individuals using GLP-1 therapy.
- Helps improve common digestive complaints while supporting overall digestive wellness.
- Promotes more regular, complete, and comfortable bowel movements.
- Encourages better sleep, lower stress, and enhanced wellbeing.
- Well tolerated, with no serious adverse events reported.

How Digexin works

Digexin is a proprietary blend of Winter Cherry root (Ashwagandha) and Okra fruit extracts, two herbals with extensive research on a broad range of health benefits. Together they provide substantial benefits to both gut and mind.

Digexin works along four primary mechanistic pathways: reduced stress signaling, improved digestive signaling, synergistic peristalsis/transit stimulation, and soothing/fortifying the gut lining. This bidirectional approach improves mood and occasional stress, contributing to happy, healthy regularity.

Address Cortisol Gut & Boost Serotonin Stimulation

Clinical Research

Digexin is backed by gold-standard, double-blind, randomized, placebo-controlled human clinical trials. Each study reported large effect sizes, high efficacy, and consistent results.^{1,2}

Constipation Symptoms

GI Transit Time

	300mg		500mg	
	Pre	Post	Pre	Post
GIT (hr)	22.05	19.08	21.05	17.54
Change	-2.97 Hours		-3.96 Hours	

Highlights:

- Over a 90% reduction in constipation, bloating, and gas.
- Increased BM frequency from clinical constipation (~3/week) to optimal (~7/week).
- Whole system benefits: improved symptoms of issues along the entire GI tract.
- Led to faster, more complete digestion.
- Highly significant. Highly effective. Large effect sizes.
- Works starting in 7 days.
