Gelatin hollow capsules

明胶空心胶囊

明胶空心胶囊是一种优质药用辅料，由精选的明胶，添加色素、遮光剂等制成，分为透明、半透明和不透明三种。其掩味效果佳、生物利用度高、外观精致、易于吞服，在胃部崩解迅速并吸收，广泛应用于医药领域。胶囊型号涵盖00#至4#等多种规格，满足不同药物装量需求，并提供环向印字、轴向印字及双色印字等定制服务。

Gelatin hollow capsule is a kind of high quality pharmaceutical excipients, made of selected gelatin, adding pigment, shading agent, etc., divided into transparent, translucent and opaque three kinds. It has good masking effect, high bioavailability, delicate appearance, easy to swallow, rapid disintegration and absorption in the stomach, and is widely used in the field of medicine. Capsule models range from 00# to 4# to meet the needs of different drug loads, and provide customized services such as circular printing, axial printing and two-color printing.

HPMC hollow capsules

羟丙甲纤维素空心胶囊

羟丙甲纤维素 (HPMC) 空心胶囊由纯植物原料制成。采用天然纤维素精制而成，满足素食者及特殊信仰人群的需求，充分体现安全、环保、健康的理念。其低水分、高韧性的特点，特别适合高吸湿性药物，尤其是中药及生物制剂的充填。HPMC空心胶囊以其卓越的性能和广泛适用性，成为高端药品和保健品的理想选择。

Hydroxypropyl methylcellulose (HPMC) hollow capsules are made from pure plant materials. Made of natural cellulose, it meets the needs of vegetarians and people with special beliefs, and fully reflects the concept of safety, environmental protection and health. It has the characteristics of low moisture and high toughness, which is especially suitable for the filling of high hygroscopic drugs, especially Chinese medicine and biological agents. HPMC hollow capsule with its excellent performance and wide applicability, become the ideal choice for high-end drugs and health care products.

Enteric gelatin hollow capsules

肠溶明胶空心胶囊

肠溶明胶空心胶囊，由优质明胶与肠溶材料精制而成，专为肠道给药。肠溶胶囊使药物在小肠部开始吸收，实现药物在肠道内定位释放，提高药物生物利用度。避免药物对胃黏膜产生较强刺激，有效解决药物遇酸不稳定的问题，减少剂量与不良反应，保证药效。

Enteric gelatin hollow capsule, made of high quality gelatin and enteric material, is specially designed for intestinal administration. Enteric capsules enable drug absorption in the small intestine, realize drug localization and release in the intestine, and improve drug bioavailability. Avoid strong stimulation of the gastric mucosa, effectively solve the problem of drug instability in acid, reduce dose and adverse reactions, and ensure efficacy.
