Proud of its Tradition and History"

Raised Punggi Ginseng with 6years of devotion.

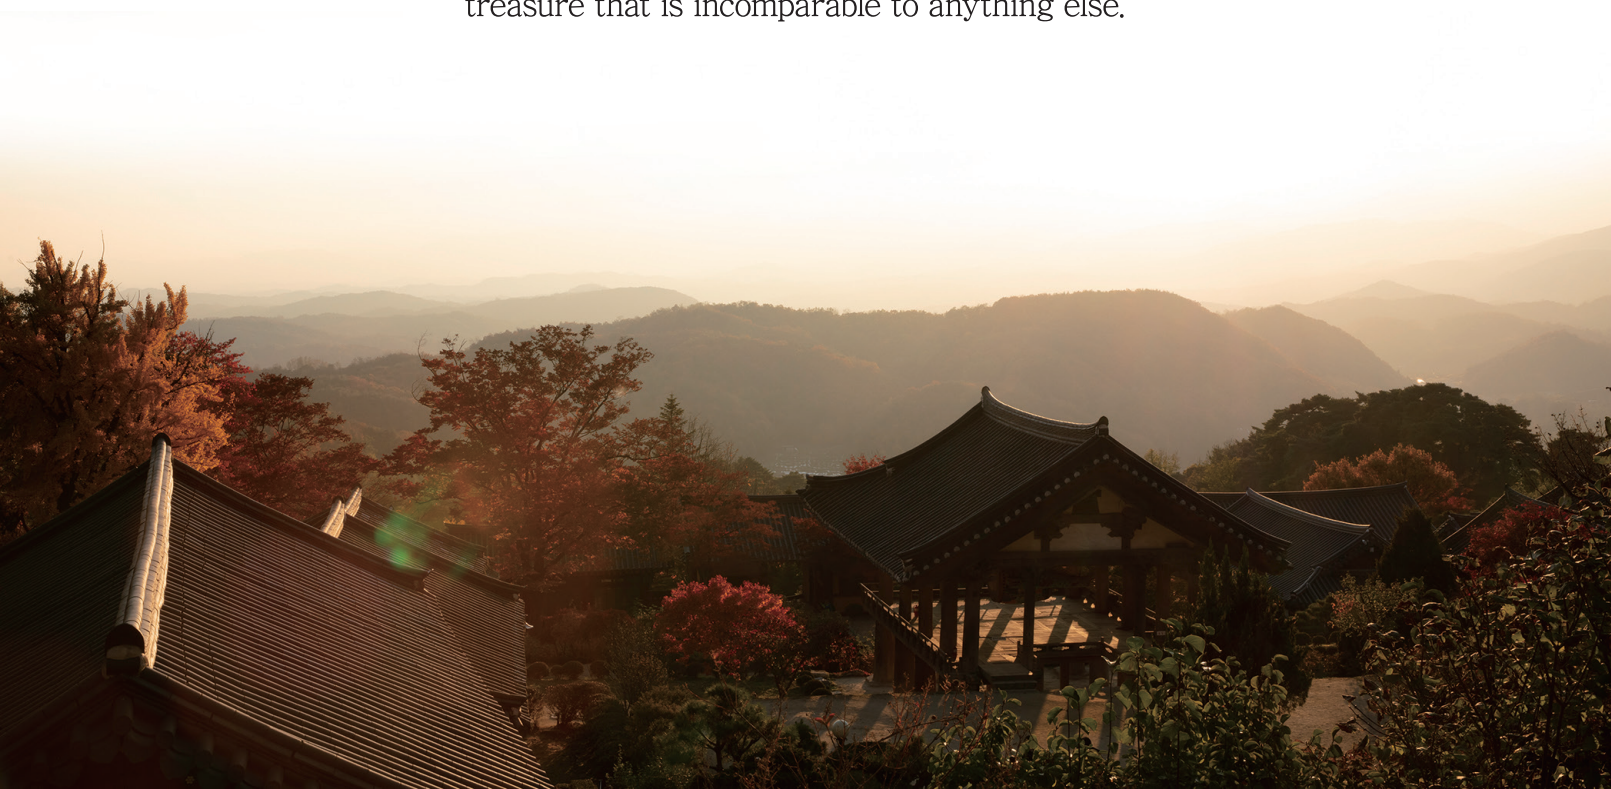

More than 110 years of traditional manufacturing know-how,
Strict quality control, produced by cutting edge manufacturing
facilities safe food Safe Food to Protect Your Family's Health

"Hwang Pung Jung Nonghyup Red Ginseng"

Presented by nature of "Punggi"

and embodied with peasant devotion.

The value of Punggi Ginseng is an invaluable
treasure that is incomparable to anything else.

Introduction of Punggi Ginseng Agricultural Cooperative

With its long history and tradition, the Punggi Ginseng Agricultural Cooperative has begun a century since its foundation in 1908 and has begun to make strong strides toward a new 100 years.

Punggi Ginseng uses contract-grown ginseng and it is in charge of the annual root certification and purchase of ginseng grown by the Punggi Ginseng Agricultural Cooperative.

We manufacture high-quality red ginseng products and health functional foods directly and sell them to consumers, using only pure domestic ginseng harvested safely.

Purpose of Establishment

Punggi Ginseng Agricultural Cooperative aims at finding market opportunity for sales of ginseng produced by its members and at facilitating their distribution while offering technical support, funding and information required for its members to cultivate and produce ginseng so that they can improve their economic, social and cultural status and contribute to public health with quality ginseng and red ginseng products.

Roles

1. Projects for farmers

- Implementing projects for instruction of cultivation techniques to enhance competitiveness of Punggi ginseng and produce quality ginseng products
- Contributing to increased income of ginseng farmers through purchasing and processing of ginseng

2. Projects for product development and distribution

- Contributing to increased sales of ginseng products by developing new ginseng and red ginseng products, and improving their quality to meet customer needs
- Creating local brand values by promoting Punggi ginseng

3. Projects for welfare and social contribution

- Scholarship : Scholarships provided to union members and their children every year
- Social Contribution : Return part of the sales to social contributions
- Facilitating local economy by creating processing jobs
- Sponsorship of national tennis players

Characteristics of Punggi Ginseng Agricultural Cooperative

1. Pre-survey of Ginseng Safety For Ginseng Purchase

Every year, the staff in charge of the ginseng purchase conducts a preliminary survey on the parcels subject to purchase, such as quality standards, expected yield, and residual pesticide tests and then purchases them after deliberation by the Purchase Review Committee. Also, saponin content is higher and medicinal properties are excellent as it is collected in autumn, when pharmacology effect is at its peak.

2. The Pride of the Ginseng Plantation (First Plantation)

Punggi area is the first place to collect wild ginseng seeds and start ginseng cultivation. There is a record that only Punggi ginseng was used in the old royal court, and if you look at the records of Samguksa Temple Site, you can see that wild ginseng grew in Punggi area around Sobaek Mountain during the Silla Dynasty.

3. The Oldest Civil Union

The Punggi Ginseng Cooperative was founded in 1908 and boasts the oldest private history. We want to repay history well beyond 100 years with high-quality ginseng and red ginseng.

4. Reliable Contract Cultivation System

We only use contract-grown ginseng.

NongHyup is in charge of the annual root certification and purchase of ginseng, which was always present at harvest time.

5. Punggi Ginseng Export to All around the World

Punggi Ginseng Agricultural Cooperative is currently gaining the status of Korean ginseng by introducing high-quality products to over 16 countries around the world by pioneering sales channels in various countries based on major markets in Asia, America, and Europe.

Certificate of Punggi Ginseng Agricultural Cooperative

KMF Halal Certificate / Certificate of Trademark Registration / GMP Certificate / Presidential award,
Minister of Agriculture and Forestry citation / FSSC22000 / ISO9001 / ISO14001
Certificate of Designation for Self-Inspection / HACCP Certificate / Certificate of Traceability Registration

[SINCE
1908]

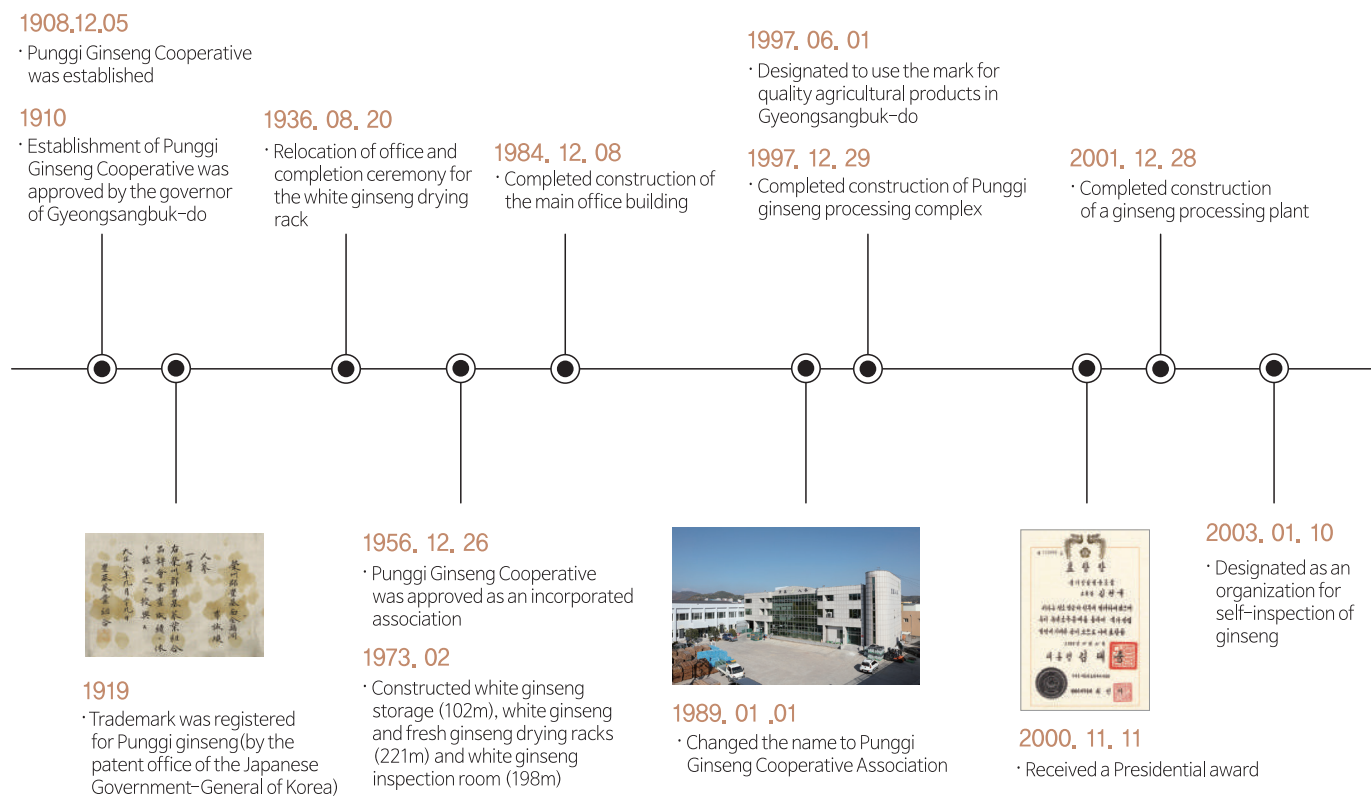

The beginning of Punggi Ginseng Agricultural Cooperative

In the 37th year of King Jungjong's regime during Joseon Dynasty (1542), Ju Se-bung was appointed as the governor of Punggi and tried to resolve the suffering of residents caused by their tribute of ginseng to the royal court. He found out that the natural environment at the foot of Sobaeksan Mountain was the most ideal place to cultivate ginseng. So he ordered to collect ginseng seeds from around the area, called Geumgye-dong at present day and to sow them in the mountains. That is the beginning of ginseng cultivation in Korea.

A book titled "History of Ginseng (1938)" says Punggi ginseng has excellent quality as they grow in a rich environment. Thus, the royal court preferred Punggi ginseng.

History of Punggi Ginseng Agricultural Cooperative

2009. 08. 17

- Constructed Premium Processing Plant and Designated as a GMP certified site

2015. 12. 05

- Received USD 5 Million Export Tower (Presidential)

2015. 12. 17

- Obtained UAE ESAM Halal certification

2017. 05. 30

- Completed construction of Punggi Ginseng Distribution Center

2017. 09. 12

- Started operating ginseng selection site

2021. 01. 15

- Organic processed food certificate

2022. 09. 30

- 2022 World Punggi Ginseng EXPO

2025.05

- Changed the name to Punggi Ginseng Agricultural Cooperative

2025.11

- Completed expansion of Cold Storage

2010. 11. 11

- Received Presidential award for industrial achievement (enhanced competitiveness in agriculture)

- Received USD 1 Million Export Tower

2016. 05. 09

- Obtained KMF Halal certification

2017. 11. 22

- Obtained HACCP certification

2021. 09. 30

- Obtained FSSC22000

2024. 07

- Modernization of GMP Processing Plant Production Facilities

The Growth of Punggi Ginseng Agricultural Cooperative

After a century since its foundation in 1908, the Punggi Ginseng Agricultural Cooperative has begun to take a strong step toward the new 100 years.

In order to promote the best ginseng and red ginseng in Korea and around the world, we have maintained our original intention for a long time through product research and development. As a result, we have supplied high quality products and services to 30 dealerships, 240 domestic dealerships and 16 countries around the world.

Domestic Sales

Direct operation and distribution management in duty free shops and hypermarkets

- Duty Free Shops : Lotte Duty Free (Myeongdong main store , World Tower store, Busan store, Jeju store, Gimhae Airport store, Incheon Airport store)
- Hypermarkets : Lotte Mart (Seoul Station store, Gimpo Airport store, Cheongju store, Seosan store, Jinju store, Songdo store, Gyeongnam store, Bupyeong store, Jamsil store, Gimcheon store, Gwangbok store, Yeongjong store)
- Home Shopping Channels : NS Home shopping and others
- Department store : DAEGU Department store and others

Managing NH Distribution Centers (Managing NH Distribution Centers)

- NH Distribution Center : Seongnam Hanaro Club, Yangjae, Changdong, Suwon, Goyang, Samsung, Busan, Dalsung, Yangju, Yongin
- Hanaro Marts : Gwanak NH Wooseong, Jungang NH Gwangjin, Dongseoul NH Sinnae, Banwol NH Local Food Andong NH, Bukdaegu NH, Gyeongju NH, Jeju NH, Gumi NH, Indong NH, Buksam NH

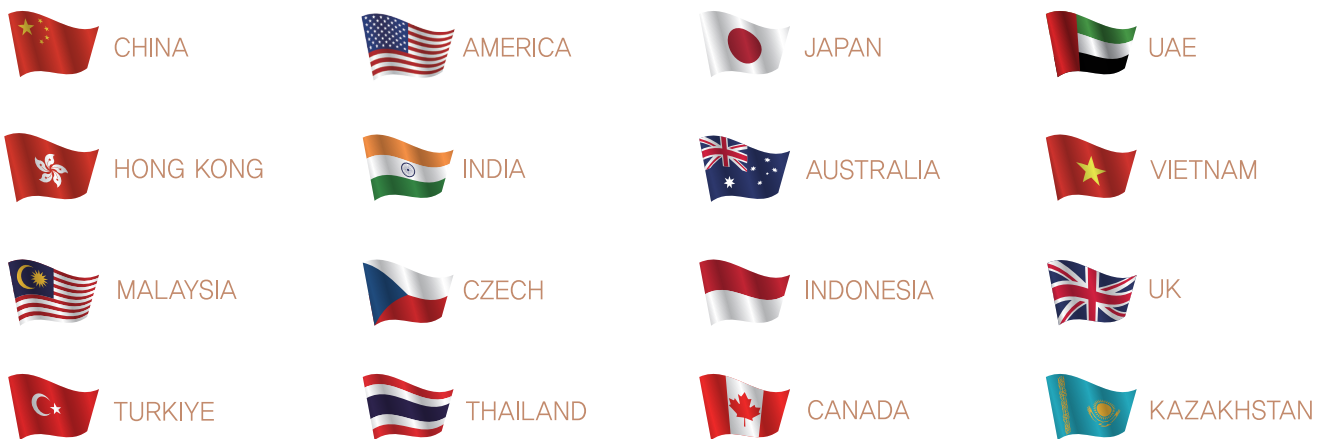

Offering B2B and B2C services in large online shopping malls and operating a welfare mall

- Large Online Shopping Malls : Coupang, SSG.com, Hyundai Hmall, Nonghyup mall, Lotte imall, Lotte On
- Direct-run brand mall, Specialty mall, Open markets, Social commerce

Overseas Sales

More than 16 countries in Asia / America / Europe

Export of finished products of Punggi Ginseng Agricultural Cooperative Brand

- We are actively selling and promoting finished products of the Punggi Ginseng Agricultural Cooperative brand through Online & offline stores based in major markets such as China, Hong Kong, and Vietnam, USA, laying the foundation for the globalization of Punggi Ginseng Agricultural Cooperative.

Raw material supply/PB(Private Brand) products Export

- We supply raw materials such as concentrates, tablets, and powders and PB(Private Brand)products to the world's leading health functional food distributors and manufacturers, and the excellent functionality of Punggi Ginseng Agricultural Cooperative red ginseng is recognized.

Premium Processing Plant

The GMP recognized plant(No. 20040018011) of the Punggi Ginseng Agricultural Cooperative, which produces high-quality red ginseng products, for specialized production of functional health food was designated as GMP facility in August 2009. In addition, by introducing a food traceability management system(May, 2016), we maintain and control records in every stage from production and processing to sales so we can ensure traceability to identify causes and take proper actions against food safety issue. The GMP recognized plant of Punggi Ginseng Agricultural Cooperative properly raises and provides the world's best ginseng, "Punggi Ginseng" safely.

Premium Processing Plant

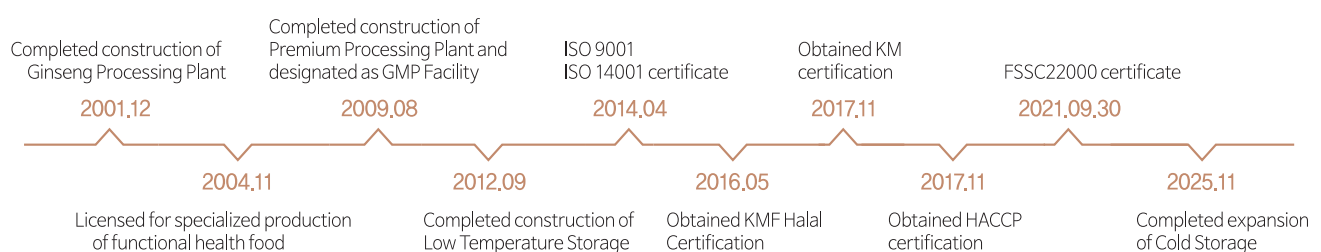

We produce the best quality ginseng with the most advanced facilities in a clean environment.

GMP(No. 2009-Daeguchoeng-0003)/ specialized in enrichment, extraction, powdering and refinement developing custom ingredients/joint research and development / specialized in OEM production

Dried ginseng slices are cultivated based on contracts and harvested at their peak they are subject to preliminary inspections for pesticide residues, quality and production volumes and are then reviewed to provide proper fresh ginseng only. We have secured production facilities based on Good Manufacturing Practice(GMP)for excellent health functional food and are committed to meticulous processes of cleaning, steaming, natural drying, forming and sorting along with the most advanced and safe techniques of extraction, enrichment, filling and packaging to produce premium quality red ginseng products.

History of Premium Processing Plant (GMP, HACCP, KMF Halal, FSSC22000)

What is Good Manufacturing Practice (GMP)?

GMP serves as the basic standard to produce quality food products with guaranteed safety and efficacy. GMP applies to production planning from raw ingredients to the release of final products in an organized manner. It requires the work environment to be hygienic so that product quality can be maintained on a continued basis.

Directions in Development

- Development of materials using red ginseng and red ginseng residue
- Developing raw materials for red ginsengs with a focus on distinctive functionality based on changes of ginsenoside
- Facilitating biological activity and bioavailability by enhancing ginsenoside absorption
- Contains all 6 functionalities by increasing major ginsenoside contents in red ginseng extracts
- Developing new recycled products through food upcycling using red ginseng residue produced after concentrated red ginseng extract

Production Facilities Scale land 9,900m and building area 3,640m

Extracting Concentrator

- Intended Use : extraction and enrichment
- Product red ginseng concentrates and extracts
- Process Standard : solids 60%, starch removal, extraction. solvent(water)

Sterilization Facility

- Name : high temperature instant sterilizer
- Capacity : 125°C/5sec, 97°C/15sec, 1000liter/1hr
- Intended Use : preprocessing sterilization for filling
- Product : liquid pouches
- Process Standard : negative in bioorganisms

Ultra-fine particle grinder and tablet press

- Name : ultrafine particle pulverizer
- Product : Powder/Red Ginseng Tablets
- Process Standard : grain size -70~12,000mesh(200~1 μ m) 9,000 to 108,000 tablets/hr

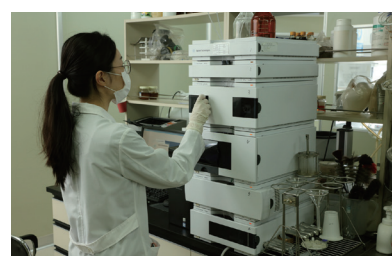

Filling and Packaging Facility

- Name : standing filler, two-line filler, shape filler, concentrate filler, multi 3-sided stick packager
- Intended Use : filling liquid pouches, filling concentrate bottles
- Process Standard: liquid drinks of 10 to 150ml or concentrates of 30 to 500g

Filling and Packaging Facility-stick filler

- Name : stick filler
- Intended Use : filling 3-sided liquid stick pouches
- Process Standard : low viscosity drinks and gel types from 5 to 15g

Physico-Chemical and Microbiological Test Facility

- Name : saponin analyzer, pesticide residue analyzer, rotating and decompressing concentrator, red ginseng index ingredient analyzing facility, and microbiological test facility
- Scope of Test
 - Physico-Chemical Test : crude saponin, ginsenoside, pesticide residue
 - Microbiological Test : general bacteria, coliform bacillus, coliform bacillus colony, fungus

"Healthy Daily Life with Punggi Ginseng"

After a busy day,

Sometimes I miss my time to take care of myself.

Take a small break in your daily life, with Punggi ginseng.

The short but precious moment can be more valuable and enriched.
