

Food safety is our responsibility

Environmental protection is our mission

Your trustworthy supplier for the highest quality organic fruits and vegetables

QI MEI

ORGANIC

since1999

Official Vegetable Supplier For 2008,2022 Beijing Olympic Games

QIMEI INDUSTRIAL GROUP CO.,LTD

Back to 1999, in order to produce organic products, Hebei Qimei Agriculture Science and Technology Co., Ltd., which was formed on a pollution-free sandy wasteland, has established the tenet of Qimei that " Food safety is our responsibility; Environmental protection is our mission.", aiming to forming Qimei's organic closed-loop supply chain. Under 24 years' guidance of experts worldwide, unremitting efforts of the Qimei's team, and hard work of farmers; Qimei has now developed and expanded into a closed-loop supply chain with organic crop farms, organic products processing line, organic poultry farms, and organic fertilizer production.

The thriling ride of Qimei has been progressing for over 24 years,yet we're only at the begining.

Ecological Model

——Ensure the safety quality of organic products

We own 866.7 Ha. of farmland that satisfy the international organic standards. Our team, experts, and local farmers possess rich experience that can make sure the organic quality of our products during the whole growing season.

The manures of free-range chickens are composted into organic fertilizer for growing organic fruit and vegetables.

After harvest, fresh vegetables and fruits are immediately sent to our factories for organic processing, which ensures the safety and quality of organic products.

Chickens fed with organic gains and vegetables roam freely around every organic crop farm.

Developing organic industry Ensuring food safety

Our Development History

1999

In 1999, previously as an English teacher, Ms. Zhao with six other people established Hebei Qimei Agriculture Science and Technology Co., Ltd. on a deserted pollution-free sandy land in order to contribute to the organic food industry. They embarked on their challenging entrepreneurship of creating Qimei's organic closed-loop supply chain by growing asparagus.

2002

In 2003,SARS came,business was stalled everywhere in China.
5 of the business partners left the company.Qimei experienced the most difficulf time and almost went bankrupt.

In 2002,products start exporting to Japan.

2003

Qimei got in the global market with good reputation.In 2008,the Olympic association found Qimei to supply the Beijing Olympic Games.

2006

In 2006,Ms.Zhao stayed through the hard time,and built the first factory with IQF and FD equipment.
Business expanded,and products were sold to more countries.

2008

In 2009, due to the successful supply of the Olympic Games, the safety and quality of Qimei's organic products have been spread in many ways, orders at home and abroad have poured in, and in response to market demand, the company has made plans to expand the development of organic industries.

2009

In 2010 Qmei's first organic store opened in China,and began to develop domestic market.

2010

In 2011,Qimei's US branch was set up in New York City.In the same year,Qimei began a long-term collaboration with Cornell University.
Qimei begin to build the new organic processing park that covers 23.3 Ha. of land.

2011

In 2013, Qimei Group launched the "sell to the world, buy from the world" journey.

2012

In 2012, Qimei first organic products store opened.

2013

In 2016,Qimei set up another branch in Shanghai and registered two new brands called"Delight Organic",and"Delight Kitchen".

2016

In 2017, Qimei cooperated with SRIT to establish Hebei Guoyan Qimei Agriculture Technology and Development Co., Ltd at Daming town, Hebei Province. Qimei signed the contract with the Second Division of the Xinjiang Production and Construction Corps, agreeing to grow 23,333.3 Ha. of organic products on their farmland.

2017

In 2018, Qimei was jointly approved by eight ministries and commissions as a national key leading enterprise in agricultural industrialization.
Qimei signed an agreement with Kimberley Farm in the United States to jointly develop organic production.

2018

In 2019, Qimei Group and Hebei Institute of Environmental Engineering jointly established Qimei Organic Industry College.

2019

In 2020, Hebei Qimei Agricultural Technology Co., Ltd. developed and expanded into Qimei Industrial Group Co., Ltd.

2020

In 2022, Qimei Group successfully completed the task of supplying food for the Beijing Winter Olympic and Paralympic Games, becoming one of the few catering supply enterprises for the Double Olympic Games in China.

2022

Our Farms

Organic farm

Except for the farms that are in transition, all of our farms have been certified organic by the USDA, Europe EU, Canada COR, Japan JAS, China OFDC.

International Market

Since its establishment, Qimei has made an organic closed-loop industry development plan that meets the international organic standards, starting from organic planting farm, strictly implementing international organic standards , products positioning the international market, and an international trade sales team established at the same time . Qimei is an early exporter of organic quick-frozen products and organic freeze-dried products in Hebei Province. After 23 years of development, Qimei has established a mature domestic and overseas sales network and after-sales service system in the international market. Safe and secure organic products sell well and are trusted by international customers. From the export of organic asparagus to Japan in 2002 to the start of importing organic milk from the United States in 2013, it fully reflects that Qimei team can not only sell organic foods well to the world, but also shows that the Qimei team is equally professional in buying organic ingredients from all over the world.

As a multinational enterprise facing the global market, Qimei’ s headquarter is located in Handan City, Hebei Province. In 2011, Qimei established an overseas business department in New York, USA, and then established a number of subsidiaries and branches in China.
Our fresh, quick-frozen and freeze-dried organic products are exported to about 37 countries including the United States, Canada, Germany, Sweden, Japan, and South Korea etc.

Rising Chinese Market

After supplying organic vegetables for Beijing Olympic games in 2008 and Winter Olympic games in 2022, Qimei’ s organic products attract the attention and favor of domestic consumers. Qimei team strictly follows international organic standards to produce products . The international and domestic standards are the same, and the ingredients that supplies to Olympics and members are the same. The sales field of Qimei has spread all over the economic circles such as Beijing-Tianjin-Hebei, Jiangsu- Zhejiang - Shanghai, Pearl River Delta and Hong Kong-Macao -Taiwan, involving 12 provinces such as Hebei, Henan, Zhejiang, Jiangsu and Shandong. A variety of sales methods such as organic healthy living hall direct sales stores, online flagship stores, and one-to-one VIP members have been formed, and they have been supplied to Michelin restaurants, realizing multiple coverage of domestic large-scale high-end channel cooperation.

Qimei Organic Product Processing Plant is designed and constructed in accordance with the organic concept and organic processing standards. It is a safe, secure and transparent "home kitchen" that consumers can see and eat throughout the process. It is a bridge and link to the market. It is the leader of Qimei organic closed-loop supply chain . The processing plant covers an area of 23.33Ha. and has 23 construction units. After all of them are put into production, it will drive 300,000 farmers to increase their income through the cultivation and production of 86666.67Ha.of organic agricultural products, and make 86666.67Ha. of land regain health due to organic cultivation; To produce 780,000 tons of richer organic food for global consumers, and to achieve employment of more than 755 people; to achieve carbon peak and carbon neutrality goals, to build a zero-carbon country, to achieve common prosperity for the elderly and villagers, and has contributed a small amount of effort to build a “blue sky and Green land,clear water”for the beautiful homeland.

We are engaged in the organic closed industry
that will leave behind for future generations

The Soil is Still The Smell Of The Soil
The Food is Still The Taste Of The Food

Zhao Yuqi, chairman of Qimei Group, and his colleagues are discussing the construction of Qimei organic products processing zone

A glimpse of the new organic processing zone

Seeing is believing, we look forward to your visit in Qimei!

With over 3000 years of history,Handan city has preserved its unique culture that attracts people from all over the world to visit.

Handan also has highly developed transportation systems that help it to be connect with major cities from north to south of the country.

Our major factory base Yongnian County is also the cradle of Tai Chi an one of the four famous vegetables towns in China.
