OUR JOURNEY

Three decades of continuous growth

State-of-the-art production infrastructure

Extrusion

Mixing

Milling

Packaging

From idea to finished product

Idea

Identifying market needs and shaping the initial product concept.

Development

Formulating recipes using our own in-house know-how.

Testing

Checking functionality and sensory qualities in the demo center.

Validation

Confirming quality and stability before production.

Production

Moving into serial production with full quality control.

Reliable logistics and full traceability

Reliable delivery

Control systems ensure the accuracy and timeliness of every delivery.

Optimized distribution

Logistics tailored to customer needs across all nine markets.

Full traceability

Every product batch is tracked from raw material to customer delivery.

FSSC 22000 certified production

Raw material control

Incoming quality control of every shipment before production.

Process control

Real-time monitoring of all production parameters.

Finished product control

Inspection of final products before delivery to customers.

Production traceability

Full traceability from raw material to finished product.

The certificate covers the production of improvers, concentrates, liquid and dry sourdough, and extruded cereal products.

Ingredients for every recipe

-  Improvers
-  Concentrates
-  Sourdough
-  Decorations and toppings
-  Specialty blends

100+
