

Textured Pea Protein Minced, 55% Protein

4 kg pack for professional kitchens

Ready in 15 minutes, no planning needed
Kept on the shelf at room temperature

Browns, holds the sauce and keeps
its bite through service

One 4 kg bag makes up to 12 kg of mince,
around 120 portions, cheaper than meat

Nutritional values

per 100 g product*

Fat → 4.4 g

of which saturated → 0.8 g

Carbohydrate → 15.8 g

of which sugars → 2.5 g

Fibre → 15.5 g

Protein → 55.0 g

*average value in dry matter

Product properties

- ✓ Hydrates 1 : 2.5 in hot water or stock, ready in 10 to 15 minutes
- ✓ Gives 2.5 to 3 kg of cooked mince from 1 kg dry
- ✓ No allergenic ingredients under Regulation (EU) 1169/2011
- ✓ Gluten-free, soy-free and non-GMO, one single ingredient
- ✓ 24 months shelf life, stored dry at ambient temperature

Also in organic, and in other forms:

Minced

Chunk

Small chunk

Pearl

Public plates are changing, from guideline to requirement

The EAT-Lancet planetary health diet moves a large part of the protein on the plate from red meat to pulses. Peas are that pulse, and public catering is following:

- ✓ **Poland:** one fully plant-based school lunch a week from 2026
- ✓ **France:** weekly vegetarian menu in school canteens
- ✓ **Denmark:** national plant-based action plan with funding
- ✓ **Germany:** guidelines put most of the plate on plants
- ✓ **United Kingdom:** buying standards for public sector catering
- ✓ **Czech Republic:** new school norms, less meat, more pulses
- ✓ **Portugal:** vegan option in public canteens since 2017
- ✓ **Netherlands:** 50/50 plant to animal protein goal for 2030
- ✓ **Norway:** red meat capped, legumes in the protein group
- ✓ **EU:** protein footprint enters green public procurement

Those markets have the rules in place or are putting them in place now, and the list keeps growing. A kitchen with a working pulse-based recipe today is ready for the tender it has to answer tomorrow.
