We are Kräuter Mix!

Rooted in Franconia, active worldwide: Our natural raw materials come from the best growing and harvesting regions. Thanks to close, long-standing relationships with our qualified suppliers, we are able to source our natural raw materials from more than 70 countries.

Comprehensive range of raw materials for pet food

We offer our customers in the pet food industry a wide range of air-dried vegetables, herbs, and spices, as well as fruits and medicinal herbs. Our extensive selection, comprising several hundred raw material groups – many of which are organic – is available as individual ingredients or in blends.

Product range

Dried vegetables and fruits:

Carrots, beets, garlic, parsnips, squash, apples, ...

Herbs and spices:

Fenugreek seeds, turmeric root, ginger, anise, rosemary leaves, ...

Medicinal herbs:

Rose hip, chamomile flowers, fennel, marigold, stinging nettle, milk thistle, peppermint leaves, ...

Custom blends for pets and livestock

Our plant-based raw materials are processed and refined in a variety of ways to preserve the integrity of the product. In addition to various cut sizes, the products can be cut, ground, flaked, shredded, sliced, cut into strips or cubes, or produced as granules.

Depending on the animal species and customer requirements, we create optimal and beneficial blends for pets and farm animals – from horses to dogs, from rodents to chickens.

A wide range of processing options

- Cleaning
- Grinding
- Mixing
- Pelletizing
- Cutting
- Germ reduction
- Storage protection treatment

Pellets for animal feed

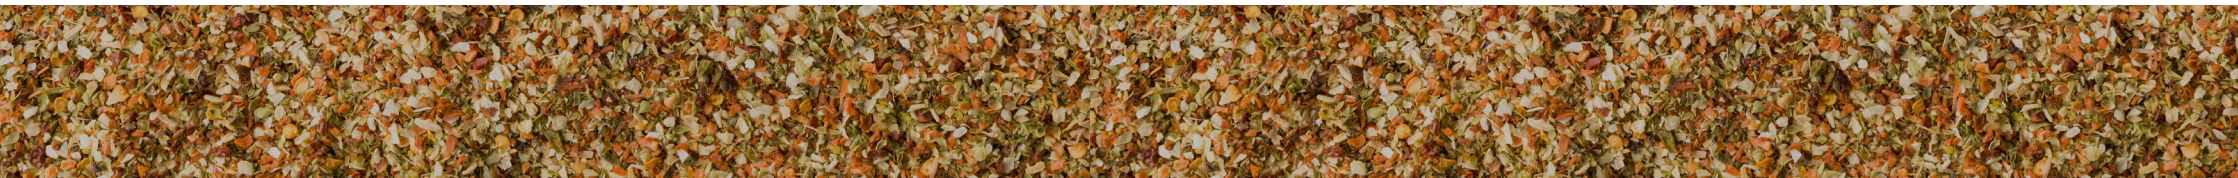

Since animals cannot select individual feed components when consuming food in pellet form, pellets ensure a consistent intake of nutrients. Furthermore, pellets allow for very precise, needs-based, and flexible feed rationing.

Kräuter Mix also offers pelletizing as a contract service!

Customized packaging

Big bags | Bags | Cartons | Small containers | Private label
