requisimus

Tailored AI
for the food & ingredient industry

Up to 25 % efficiency gains in your routine processes.

AI with measurable added value

We build AI where it pays off: in the processes your teams repeat every day.

AI already at work in the ingredient industry.
Use Cases & Information

R&D & Sales

- Fewer formulation trials
- Recipe management for existing products without sensory changes
- A faster innovation process

Documentation & Quality

- Fully automated sensory documentation
- Automation of time-consuming routine processes
- Effortless traceability for audits

Compliance & Legal

- Efficient documentation for customers and authorities
- Automated regulatory checks during development and across the portfolio

How do we get started?

Risk-free for you: We analyse whether your digitalisation use case is economically viable.

STEP 1

Consultation

- Your challenges
- Our technology & implementation know-how
- Concrete solution concepts

STEP 2

Individual Digitalisation Report

- Feasibility assessment
- High-level roadmap
- Cost indication
- Potential assessment
- Recommended next steps

Decision Matrix

POSITIVE ROI EXPECTED?

YES

Comprehensive document for your internal approval

STEP 3

Implementation of your individual solution

- Agile, customer-centric software development
- Fast-track from MVP to a professional software solution
- User journey perfectly tailored to your employees
