# EMBACO's VMS Bottle & Jars Packaging

**In the Vitamins, Minerals & Supplements market, product quality is only part of the equation. The right packaging protects your formulation, supports efficient production and helps your brand stand out in a crowded marketplace.**

**At EMBACO, we develop PET and rPET packaging solutions that combine performance, flexibility and shelf appeal. From capsules and tablets to gummies, powders and nutritional supplements, our bottles, jars and PET packers are designed to help bring your products to market faster and with confidence.**

**All Bottles & Jars are Available in rPET**
We use the highest quality, grade PCR (post-consumer recycled) PET to support sustainable packaging solutions without compromising on performance or appearance.

**Produced in Europe Using 100% Renewable Energy**
We pledge to produce better packaging for people and the world by manufacturing responsibly and reducing our environmental footprint.

**Stand Out on the Shelf**
Custom colours, screen printing and embossing options make it easy to create packaging that strengthens brand recognition and attracts attention where it matters most.

**Custom Colours and Barrier Additives**
We can manufacture in any custom colour with UV and O2 barrier additives to help protect sensitive formulations, with low MOQs.

**Range of Closure & Sealing Options**
Our closures can be supplied with Pressure Sensitive and Induction Heat Seal Liners to seal the containers for your consumer's protection.
