Natural solutions for your well-being

CATALOGUE
FOR PROFESSIONAL USE ONLY

COMPANY PROFILE

Since 1982, we cultivate well-being in its most natural form, confident in the strength and treasures enclosed in nature.

Every day we study, do research and create products that address all the aspects of human well-being, drawing from Nature only the best raw materials, harvested exclusively in countries where they can grow in the best climate and conditions.

An internal research team selects the best suppliers on the market, to pick up the latest innovations and constantly improve the quality of our products.

After a thorough research on raw materials, the plant extracts are standardized through a scientific process subject to strict controls. This guarantees that we are not altering the properties thereof and ensures constant effectiveness.

Always fully respectful of Nature, our source of well-being and health, we choose the most innovative technological instruments and the most accurate and less invasive methods to ensure functional solutions, tested by the most prestigious Italian Universities.

Every day, in Erba Vita laboratories, we strive for continuous growth.

Welcome to a better world, a HEALTHY WORLD.

Our mission

We believe in the healing powers of nature from which we draw the raw materials to make high-quality products based on research and science.

We protect the well-being and health of people, thinking about their future.

Our vision

Science allows us to extract from raw material their best properties and virtues.

The continuous research allows us to make products that are more innovative, effective and functional for people's health.

Values

- Respect for nature
- Care and concern for the individual
- Quality of product
- Scientific innovation
- Flexibility of service
- Ethics and transparency
- Responsibility and awareness

MARKET LEADER IN CUSTOM-MADE PRODUCTS

The quality choice of our customers comes first!

Erba Vita increases the business of its partners and meets the needs of the market by developing a private label product line.

The company, being one of the most advanced in the industry of phytotherapy and food supplements, offers its know-how, enhancing customer loyalty, thanks to a close interaction with the client and his needs, to provide *ad hoc* customized products. Skills, interaction and promptness are the features that made the private label service of Erba Vita the first among the other manufacturers in the sector of phytotherapy, food supplements, as well as beauty and skin care products.

ALL-INCLUSIVE SERVICES

RESEARCH & DEVELOPMENT

Since the last century, phytotherapy evolved to the rank of a scientific discipline.

For this reason, Erba Vita believes in the ongoing research targeted to ingredients of plant origin aimed at new scientific and technological findings. New types of extracts, standardized concentrations, synergy of active principles, which give life to products with innovative formula high effectiveness, make up the basis of our daily work, in our strive to develop products for human health. Our researchers make excellence and quality their own work standards.

Ongoing collaborations with Academic Research Institutions, where clinical studies are conducted, prove this constant commitment.

QUALITY

The Quality System of Erba Vita is recognized since 2001, when the company obtained the certification UNI EN ISO 9001:2008 issued by Bureau Veritas Quality International.

Through the implementation of such quality system and the constant compliance with the requirements, the company commits daily to conduct researches aimed to improve its standards in a consistent, effective and sustainable manner.

TRAINING

Erba Vita has always been very attentive to the technical, scientific and marketing training, supporting all of its employees.

Erba Vita aims to have highly qualified staff, able to work effectively in the well-being sector, through the use of innovative methods, in terms of both scientific and marketing training. A series of dedicated events, where every course is built to measure for each professional, whether they are physicians, pharmacists, herbalists, medical consultants or operators in the well-being industry in general. A team of top-level Teachers, qualified to transfer the most innovative scientific training and advertising techniques, accompanies both the clients and our collaborators on a path aimed at excellence.
