Randomized double blind placebo-controlled clinical trial

50 HEALTHY SUBJECTS 50% Pinorox group - 50% Placebo group 18 - 40 years old	MEN AND WOMEN 50% Sports Subjects - 50% Healthy subjects (With Regular Lifestyle)	200 MG/DAY 90 days
---	---	-----------------------

1. Pinorox™ enhances endurance capacity

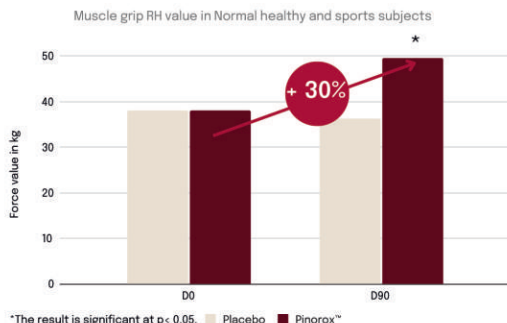

BRUCE PROTOCOL TREADMILL TEST

Changes from baseline in rate of oxygen consumption (VO2 max) compared to Placebo. Subjects given Pinorox™ showed increased uptake of Oxygen (VO2 max), resulting in better Endurance.

3. Pinorox™ improves muscle strength

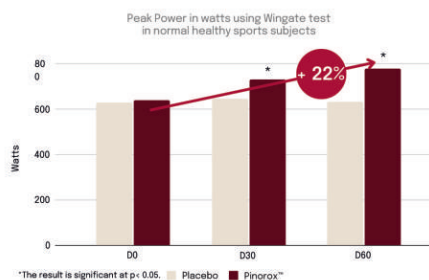

MUSCLE GRIP STRENGTH (RH-RIGHT HAND) VALUE USING HANDHELD DYNAMOMETER

The muscle grip strength of subjects was increased for both hands after 90 days, reflecting an overall improvement of general body strength.

2. Pinorox™ increases exercise tolerance

WINGATE ANAEROBIC TEST (WANT)

The Wingate Anaerobic Test evaluates the anaerobic power of lower body

- Subjects given Pinorox showed significant improvement in power output value (Watts)
- In 60 days subjects are +22% tolerant to exercise
- Pinorox™ reduces fatigue in subjects which help for the recovery post-exercise.

ONE-REPETITION MAXIMUM (1-RM) BENCH PRESS TEST

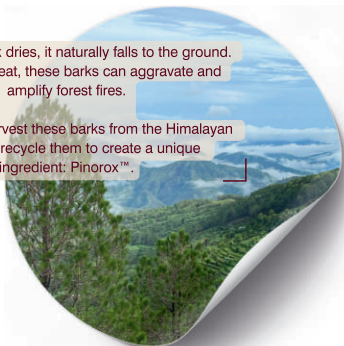

➔ **+10kg** in 90 days, on the maximum weight subject given Pinorox™ can lift in one time

Scan to view paper

When pine bark dries, it naturally falls to the ground. During high heat, these barks can aggravate and amplify forest fires.

We carefully harvest these barks from the Himalayan forest and recycle them to create a unique ingredient: Pinorox™.
